INDEPENDENT AUDITORS' REPORT

To the Members of Finquest Financial Solutions Private Limited

Report on the Ind AS Standalone Financial Statements

1. We have audited the accompanying Ind AS Standalone financial statements of Finquest Financial Solutions Private Limited ("the Company"), which comprise the Balance Sheet as at 31st March 2020, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Cash Flows and the Statement of Changes in Equity for the year then ended, and a summary of the significant accounting policies and other explanatory information.

Opinion

2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including the Ind AS, of the state of affairs (financial position) of the Company as at 31st March, 2020, and its Profit (financial performance including other comprehensive income), its Cash Flows and the Changes in Equity for the year ended on that date other than the fact that company has recognized the loss allowance on Non-Performing assets as per RBI prescribed norms for NON-BANKING FINANCIAL COMPANIES instead of expected credit loss allowance as given under Indian Accounting Standard 109, (IND AS 109) "Classification and measurement of Financial Assets and Financial Liabilities" and Indian Accounting Standard 107 "Financial Instruments : Disclosures".

Emphasis of matter :

We observed that as per the records produced to us company is liable to appoint Company Secretary as per Companies Act, 2013. However, During the year, the appointed CS resigned from the designation and another CS was appointed within 6 months but old CS who was there during the financial year is unavailable for signing the financials. Hence Financials are not signed by any CS.

Basis for Opinion

3. We conducted our audit of the Standalone Ind AS Financial Statements in accordance with the Standards on Auditing ("SAs") specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's

Responsibilities for the Audit of the Ind AS Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the independence requirements that are relevant to our audit of the Ind AS Financial Statements under the provisions of the Act and the Rules made there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Ind AS Financial Statements.

Key Audit Matters

4. Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Ind AS Financial Statements of the current period. These matters were addressed in the context of our audit of the Ind AS Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters:

a. Impact of COVID-19 on Preparation of Financial Statements:

Attention is drawn to notes in the Financial statements.

b. Impairment of Financial & Non – Financial Assets as per Ind AS : Impairment on loans are not provided where borrowers have provided enough security which can cover principal and interest amount till date.

c. Transaction with Wholly owned Subsidiary : Company Claims amount in respect of one of the assignment and opted for not relinquishing its security interest and decided to realise the amount u/s 52 of IBC, 2016

Krihaan Texchem Pvt Ltd, wholly owned subsidiary of Finquest, offered to buy the fixed assets (security interest) from company at a consideration of Rs.165.51 crore.

NCLT, at its hearing held on 17th March 2020 directed the liquidator to hand over the possession of fixed assets to company and execute necessary documents in respect of sale of fixed assets to subsidiary consequently Gain in part on realisation of Stressed asset is booked amounting to Rs. 58.75 crore

d. Employee Benefit Expense as per Ind AS 19

Other Matters

5. The audit of the Financial Statements has been conducted after considering the impact of COVID-19 on the business and appropriate disclosures, wherever applicable, have been made in the Notes annexed to the Financial Statements.

Management's Responsibility for the Financial Statements

6. The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the State of Affairs (financial position), Profit or Loss (financial performance including other comprehensive income), Cash Flows and Changes in Equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Act, read with the relevant rules issued thereunder.
7. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

8. Our responsibility is to express an opinion on these Ind AS Standalone financial statements based on our audit.
9. We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made there under.
10. We conducted our audit of the Ind AS financial statements in accordance with the Standards on Auditing specified under section 143 (10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Ind AS Financial Statements are free from material misstatement.

11. An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the Ind AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the Ind AS financial statements.
12. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Ind AS financial statements.

Report on Other Legal and Regulatory Requirements

13. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of section 143(11) of the Act, we give in "Annexure-A" a statement on the matters specified in paragraphs 3 and 4 of the Order.
14. As required by section 143(3) of the Act, we report that:
 - a. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b. In our opinion, proper books of account as required by law have been kept by the company so far as it appears from our examination of those books.
 - c. The Balance Sheet, the Statement of Profit and Loss, the Statement of Cash Flows and the Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
 - d. In our opinion, the aforesaid Ind AS financial statements comply with the Indian Accounting Standards prescribed under Section 133 of the Act, read with the relevant rules issued thereunder.
 - e. On the basis of the written representations received from the directors as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164(2) of the Act.

- f. With respect to the adequacy of the internal financial controls over financial reporting of the company and the operating effectiveness of such controls, refer to our separate Report in "Annexure-B".
- g. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us :
- i. The Company does not have any pending litigations which would impact its financial position.
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
 - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the company.

ANNEXURE-B

Report on the Internal Financial Controls under Clause i of Sub-section 3 of Section 143 of the Companies Act, 2013("the Act") referred to in paragraph 11(f) of our Independent Auditors' Report of even date

1. We have audited the internal financial controls over financial reporting of **Finquest Financial Solutions Private Limited** ("the Company") as of March 31, 2020 in conjunction with our audit of the Ind AS Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

2. The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

3. Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over

financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

5. We believe that the audit evidence, we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

6. A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.

Note:

Nature and Purpose of Reserves

1. Statutory Reserve

In terms of Section 45-1C of the RBI Act, NBFCs are required to create a reserve fund and transfer therein a sum not less than twenty per cent of its net profit every year. The above requirement is to give intrinsic strength to the balance sheets of the companies. This reserve could be used for purposes as stipulated by the Reserve Bank of India from time to time.

2. Securities Premium

Securities premium reserve is used to record the premium on issue of shares. The reserve can be utilised only for limited purposes such as issuance of bonus shares in accordance with the provisions of the Companies Act, 2013

3. Retained Earnings

Retained earnings are the profits that a company has earned to date, less any dividends or other distributions paid to investors.

4. Other Comprehensive Income (OCI)

Other Comprehensive Income refers to items of income and expenses that are not recognised as a part of the profit and loss account. However, the entity may transfer those amounts recognised in other comprehensive income within equity. The gain/loss on actuarial valuation of gratuity liability is considered in other comprehensive income.

29. In the past, the Company had acquired certain stressed loan assets by way of assignment, with a view to recover/realise these debts ('transaction'), the corporate debtor of which went into liquidation process under the Insolvency and Bankruptcy Code, 2016 ('Code'). The Company exercised its option under section 52(1)(b) of the Code to realise its security interest (assets held as security) on its own. During the year, the Liquidator, by his Order dated 19.02.2020, admitted the Company's exclusive claim to its security interest, entitling the Company to enforce, realise, settle, compromise or deal with those assets under section 52(4) of the Code. Accordingly, these assets are shown as 'Assets acquired in partial satisfaction of debts-claim' as part of the Financial Assets, at their net realisable value (NRV), which is reckoned at the price they would fetch on their disposal, but after deducting therefrom prior costs/charges statutorily payable out of the realisations. In the opinion of the Company, excess of the NRV of these assets over the cost of the transaction, is profit/gain arising from the transaction, which is accrued during the year, and therefore, it is recognised as revenue from operations for the year.

30. As per the agreement between the Company and Suraksha Asset Reconstruction Pvt. Ltd. ('Suraksha'), return on certain credit Facility extended by the Company to Suraksha ('transaction') is linked to Suraksha's internal rate of return ('IRR') from realisation of Yamuna Expressway Tolling Ltd. account ('Yamuna Account'), i.e., the Financial Asset, acquired by Suraksha from Bank for asset reconstruction. Consequently, the Company's income from this transaction is ascertainable only upon the final outcome of the resolution of Yamuna Account and the resultant IRR yield of Suraksha from realisation of the Financial Asset. Accordingly, pending the resolution of Yamuna Account, the Company cannot recognise any income from the transaction during the FY 2019-20, there being significant uncertainty.

31. Disclosures as per RBI Guidelines (Para 73 of NBFC - NDSI Master Directions dated September 01, 2016 :

Income tax	1,500,000	2011-12
Income tax	13,831,098	2014-15
Income tax	905,369	2013-14

33. COVID Impact

All the possible impact of known events arising from COVID-19 pandemic in the preparation of the financial results have been considered. However, the impact of assessment of COVID-19 is a continuous process given the uncertainties associated with its nature and duration. The Board will continue to monitor any material changes to future economic conditions it is very difficult to assess the future outlook at this stage as we are not yet past the COVID-19. It is very difficult to assess the future outlook at this stage as we are not yet past the COVID-19 crisis. However, given the trend of our operations, the Board is confident that it will tide this

Employee benefits plans

A. Gratuity

Every employee is entitled to a benefit equivalent to fifteen days salary last drawn for each completed year of service in line with the Payment of Gratuity Act, 1972. The same is payable at the time of separation from the Company or retirement whichever is earlier. The benefits vest after five years of continuous service.

The Company has a defined benefit plan for post-employment benefits in the form of Gratuity. Gratuity Benefits liabilities of the company are Unfunded. The Company accounts for gratuity based on an actuarial valuation which is carried out by an independent actuary as at the year end. The actuarial valuation method used by the independent actuary for measuring the liability is the Projected Unit Credit Method. Since the liabilities are unfunded, there is no Asset-Liability Matching strategy devised for plan.

Based on the actuarial valuation obtained in this respect, the following table sets out the status of the gratuity plan and the amount recognised in the Company's financial statement as at the balance sheet date :

Particulars	31 March 2020	31 March 2019	31 March 2018
A. Change in present value of obligations			
Liability at the beginning of the year	436,639	269,691	-
Adjusted through retained earnings	0		269,691
Transfer in/ (out) obligation	0		
Current service cost	256057	204,380	
Interest cost	29879	18,733	
Actuarial losses / (gain)	191339	(56,165)	
Past service cost			
Benefits paid			
Liability at the end of the year	913,914	436,639	269,691

D. Expense recognized in the statement of profit and loss			
Current service cost	256057	204,380	-
Interest cost	29879	18,733	-
Past Service Cost		-	-
Net gratuity expense	285,936	223,113	-
E. Remeasurements recognized in the OCI			
Actuarial (gain) / loss arising from	191339	(56,165)	
- experience adjustments	161750	(64,314)	
- actuarial assumptions	29589	8,149	

F. Actuarial Assumptions

Particulars	31 March 2020	31 March 2019	31 March 2018
Discount Rate	6.25%	6.95%	7.35%
Salary escalation rate	7.00%	7.00%	7.00%
Attrition Rate - Age (Years)			
25 & below	20.00%	20.00%	20.00%
25-35	20.00%	20.00%	20.00%
35-45	20.00%	20.00%	20.00%
45-55	20.00%	20.00%	20.00%
55 & above	20.00%	20.00%	20.00%
Mortality rate	Indian Assured Life Mortality (2012-14) Ultimate	Indian Assured Life Mortality (2006-08) Ultimate	Indian Assured Life Mortality (2006-08) Ultimate
Retirement Age	60 Years	60 Years	60 Years

Assumptions regarding future mortality experience are set in accordance with published statistics and mortality tables. The defined benefit plan expose the company to actuarial risks, such as longevity and Interest rate risk. The weighted average duration of the defined benefit obligation was 4.69 years (31 March 2018: 4.73 years).

The estimates of future salary increases, considered in actuarial valuation, take account of inflation, seniority, promotion and other relevant factors.

The overall expected rate of return on assets is determined based on market prices prevailing on that date, applicable to the period over which the obligation is to be settled.

Sensitivity analysis

The sensitivity of the defined benefit obligation to changes in weighted principal assumption are as below :

Gratuity

Particulars	31 March 2020		31 March 2019	
	Increase	Decrease	Increase	Decrease
Discount rate (50 bps movement)	-2.39%	2.50%	-2.32%	2.43%
Salary escalation rate (50 bps movement)	1.04%	-1.02%	0.76%	-0.73%

Sensitivity of significant actuarial assumptions is computed by varying one actuarial assumption used for the valuation of defined benefit obligations by 50 basis points, keeping all the other actuarial assumptions constant. Although the analysis does not take into account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumption shown.

B. Compensated absences

Particulars	31 March 2020	31 March 2019	31 March 2018
A. Change in present value of obligations			
Liability at the beginning of the year	667,958	52,866	-
Adjusted through retained earnings			52,866
Transfer in/ (out) obligation			
Current service cost	408,366	230,371	
Interest cost	41,429	3,459	
Actuarial losses / (gain)	145,584	381,262	
Past service cost			
Benefits paid	-45,700		
Liability at the end of the year	1,217,637	667,958	52,866

Notes to the financial statements as at 31st March 2020

Debt securities	-	-	-	-	-
- Non-Convertible Debentures	-	-	-	-	1,750,000,000
Other financial liabilities	-	-	-	-	-

Short-term financial assets and liabilities

Short-term financial assets and liabilities For financial assets and financial liabilities that have a short-term maturity (less than twelve months), the fair value are a reasonable approximation of their carrying cost. Such instruments include: cash & bank balances, short term borrowings and trade receivables & trade payables without a specific maturity. Such amounts have been classified as Level 3 on the basis that no adjustments have been made to the balances in the balance sheet.

Loans and advances

The fair values of loans and advances are estimated by discounted cash flow models. For fixed rate loans, the fair value represents the discounted value of the expected future cashflow. For floating rate interest loans, the discounted value of the expected cash flows represents the carrying amount of the loans.

Borrowing & Debt Securities

Non-convertible debentures have been valued based on Corporate bond spread matrix methodology prescribed by FIMDA under "guidelines / clarification for valuation of investments".

Notes to the financial statements as at 31st March 2020

(All amounts are INR, unless expressed otherwise)

31 Financial Risk Management

The Company has exposure to the following risks from financial instruments:

- Credit risk
- Liquidity risk
- Market risk (currency risk)

This note presents information about the Company's objectives, policies and processes for measuring and managing risk.

Risk management framework:

The Board has the overall responsibility for the establishment and oversight of the Company's risk management framework. The board of directors has established the Risk Management Committee, which is responsible for developing and monitoring the Company's risk management policies. The committee reports regularly to the board of directors on its activities. The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies are reviewed regularly to reflect changes in market conditions and the Company's activities

A. Credit risk

Credit risk is the risk of financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the company's receivables from customers. The carrying amounts of financial assets represent the maximum credit risk exposure.

i) Credit risk management approach

The Company performs necessary due diligence on dealers viz. financial analysis, background checks, CIBIL, grading etc to arrive at sanctioning of limit. The Company follows the grading tool used by the group globally where certain qualitative and quantitative factors are considered to arrive at grading which helps in ascertaining the probability of default 'PD' of a particular client. This is used for decision making on limit sanction and precautions to be undertaken for a said client.

ii) Expected credit loss

Expected credit losses are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive).

The Company measures ECL based out of a probability based outcome using a multiple scenario approach such as Best Case, Base Case & Worst Case and assigning weightages to each of the scenario.

Definition of Default

The Company's definition of default is aligned with regulatory guidelines issued by RBI and internal credit risk management practices.

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the company in full, without recourse to actions such as realising security (if any is held); or
- the financial asset is 90 days or more past due
- identified by the management as such

The Company's internal rating and PD estimation process

Probability of default (PD) is a key risk parameter in the ECL calculations. It is defined as the likelihood that a counterparty will not be able to meet its debt obligations in the future. A 12 months marginal PD is applied for all Stage 1 assets and a lifetime PD is applied for all Stage 2 and Stage 3 assets.

The company uses historical data to arrive at PDs which is based on rating Internal Rating Transition matrix and Roll Rate Estimation basis for its loans portfolios.

For arriving at PDs the company also takes into account relevant macro-economic factors both current and forecasted and use statistical model to arrive at the forecasted PDs.

The Company combines exposures that exhibit similar behaviour into pools based on identified risk drivers so that counterparties are behaviourally homogenous within pools and heterogeneous across pools. To do so, the Company relies on industry practices and expert judgement.

Exposure at Default

Exposure at default (EAD) is estimation of the extent that the Company is exposed to borrower in the event of default. EAD is arrived at take into account any expected changes in the exposure after the assessment date.

EAD in the case of facilities with no limits will be the outstanding exposure which will be calculated as principal + Due interest + Interest accrued but not due (as on reporting date). To calculate the EAD for a Stage 1 loan, the Company assesses the possible default events within 12 months for the calculation of the 12mECL. For Stage 2 and Stage 3 financial assets, the exposure at default is considered for events over the lifetime of the instruments.

The Company determines EADs by modelling the range of possible exposure outcomes at various points in time, corresponding the multiple scenarios. The Ind AS 109 PDs are then assigned to each economic scenario based on the outcome of Company's models.

Loss Given Default (LGD)

Loss given default (LGD) is defined as the forecasted economic loss in case of default. LGD computation is based on the Company's losses on defaulted accounts after consideration of recovery percentages. LGD computation is independent of the assessment of credit quality and thus applied uniformly across all stages.

The company computes LGD taking into account the value of collaterals and experience of past recovery from the defaulted cases. The recoveries are adjusted with time period delay and direct cost involved. Under Ind AS 109, LGD rates are estimated for the Stage 1, Stage 2 and Stage 3 segment of each asset class. These are repeated for each economic scenario as appropriate.

When assessing forward-looking information, the expectation is based on multiple scenarios. Examples of key inputs involve changes in, collateral values including property prices for mortgages, payment status or other factors that are indicative of losses.

Significant in Credit Risk (SICR)

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due. At each reporting date, the company assesses whether the credit risk on a financial instrument has increased significantly since its initial recognition. To make the assessment, Company considers available quantitative and qualitative information and also considers the company's historical experience and expert credit assessment.

Besides, the company also recognized SICR based on factors such as internal rating of borrowers, ssector or segment collectively assessed to have SICR, high risk events/attributes of client (bankruptcy etc.)

The below table shows the gross carrying amount of financial assets by credit ratings along with corresponding expected credit

Year ended 31 March 2020

Particulars	Asset group	Credit rating	Estimated gross carrying amount at default	Loss Rate	Carrying amount net of impairment provision
Loss allowance measured at 12 month expected credit losses	Loans at Amortized cost				
Loss allowance measured at life-time expected credit losses, not credit impaired	Loans at Amortized cost				
Loss allowance measured at life-time expected credit losses, credit impaired	Loans at Amortized cost				

Year ended 31 March 2019

Particulars	Asset group	Credit rating	Estimated gross carrying amount at default	Loss Rate	Carrying amount net of impairment provision
Loss allowance measured at 12 month expected credit losses	Loans at Amortized cost				
Loss allowance measured at life-time expected credit losses, not credit impaired	Loans at Amortized cost				
Loss allowance measured at life-time expected credit losses, credit impaired	Loans at Amortized cost				

Year ended 1 April 2018

Particulars	Asset group	Credit rating	Estimated gross carrying amount at default	Loss Rate	Carrying amount net of impairment provision
Loss allowance measured at 12 month expected credit losses	Loans at Amortized cost				
Loss allowance measured at life-time expected credit losses, not credit impaired	Loans at Amortized cost				
Loss allowance measured at life-time expected credit losses, credit impaired	Loans at Amortized cost				

The movement in the allowance for impairment for loans at amortised cost is as follows.

	12 month ECL	Lifetime ECL - not credit impaired	Total
Balance as at 31 March 2018			
Net remeasurement of loss allowance	-	-	-
Transfer to 12 Month ECL from lifetime	-	-	-
Transfer to lifetime ECL-not credit-impaired	-	-	-
Transfer to lifetime ECL-credit impaired	-	-	-
Financial assets derecognised	-	-	-
New financial assets acquired	-	-	-
Balance as at 31 March 2019			
Net remeasurement of loss allowance	-	-	-
Transfer to 12 Month ECL from lifetime	-	-	-
Transfer to lifetime ECL-not credit-impaired	-	-	-
Transfer to lifetime ECL-credit impaired	-	-	-
Financial assets derecognised	-	-	-
New financial assets acquired	-	-	-
Balance as at 31 March 2020			

The below table shows the maximum exposure to credit risk by class of financial assets. It also shows the financial effect of the collateral held as security (quantification of the extent to which collaterals mitigate credit risk), and the net exposure to credit risk.

Year ended 31 March 2020

	Maximum exposure to credit risk	Fair value of the collateral	
		Vehicles	Net Exposure
Financial assets			
Cash and cash equivalents	17,192,586	-	17,192,586
Trade Receivables	-	-	-
Loans	7,643,230,788	-	7,643,230,788
Investments	853,927,032	-	853,927,032
Other financial assets	1,303,681,232	-	1,303,681,232
Total financial assets	9,818,031,638	-	9,818,031,638

Year ended 31 March 2019

	Maximum exposure to credit risk	Fair value of the collateral	
		Vehicles	Net Exposure
Financial assets			
Cash and cash equivalents	83,181,978	-	83,181,978
Trade Receivables	20,526	-	20,526
Loans	8,430,525,063	-	8,430,525,063
Investments	2,305,031,580	-	2,305,031,580
Other financial assets	-	-	-
Total financial assets	10,818,759,147	-	10,818,759,147

Year ended 31 March 2018

	Maximum exposure to credit risk	Fair value of the collateral	
		Vehicles	Net Exposure
Financial assets			
Cash and cash equivalents	37,410,027	-	37,410,027
Trade Receivables	32,970,680	-	32,970,680
Loans	9,270,079,517	-	9,270,079,517
Investments	1,927,465,650	-	1,927,465,650
Other financial assets	29,750,000	-	29,750,000
Total financial assets	11,297,675,874	-	11,297,675,874

The below table provides description and quantitative information of the collateral held as security for credit-impaired financial assets.

Year ended 31 March 2020		Fair value of the collateral	
Type of collateral	Maximum exposure to credit risk	Vehicles	Net Exposure
Loans	-	-	-
Total credit-impaired financial assets	-	-	-
Year ended 31 March 2019		Fair value of the collateral	
Type of collateral	Maximum exposure to credit risk	Vehicles	Net Exposure
Loans	-	-	-
Total credit-impaired financial assets	-	-	-
Year ended 31 March 2018		Fair value of the collateral	
Type of collateral	Maximum exposure to credit risk	Vehicles	Net Exposure
Loans	-	-	-
Total credit-impaired financial assets	-	-	-

Write off

Financial assets are written off when there is no realistic prospect of recovery. This is generally the case when the company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with Company's procedures for recovery of amounts due.

Below is the details of the financial assets that were written off during the reporting period and are still subject to enforcement activity.

Year ended 31 March 2020

Contractual outstanding
Amount written off during the year

31 Financial Risk Management (continued)

Financial instruments – Financial risk management (continued)

D. Interest rate risk

Interest rate risk is defined as the adverse impact of the interest rates movements on the financial condition of the company. The immediate impact of changes in interest rates is on the company earnings by changing its Net Interest Income (NII). A long-term impact of changing interest rates is on company's Market Value of Equity (MVE) or Net Worth as the economic value of the assets, liabilities and off-balance sheet positions get affected due to variation in market interest rates. The interest rate risk when viewed from these two perspectives is known as 'earnings perspective' and 'economic value perspective', respectively.

Sources of Risk

- Repricing risk: The Company encounters interest rate risk in several ways, the primary form of interest rate risk arises from timing differences in the maturity (for fixed rate) and repricing (for floating rate) of the company's assets, liabilities positions.
- Yield curve risk: Repricing mismatches can also expose the company to changes in the slope and shape of the yield curve. Yield curve risk arises when unanticipated shifts of the yield curve have adverse effects on the company's income or underlying economic value.
- Basis risk: Basis risk arises from imperfect correlation in the adjustment of the rates earned and paid on different instruments with otherwise similar repricing characteristics.

i. Interest rate risk management

The GAP Analysis approach is followed to measure the interest rate risk:

The GAP or mismatch risk is measured by calculating gaps over different time intervals as at a given date. Gap analysis measures mismatches between rate sensitive liabilities and rate sensitive assets. An asset or liability is normally classified as rate sensitive if:

- within the time interval under consideration, there is a cash flow;
- the interest rate resets/reprices contractually during the interval;
- it is contractually pre-payable or withdrawable before the stated maturities;
- It is dependent on the changes in the Bank Rate by RBI or market products.

The Gap report is generated by grouping rate sensitive liabilities, assets and off-balance sheet positions into time buckets according to residual maturity or next re-pricing period, whichever is earlier. All investments, advances, deposits, borrowings, purchased funds, etc. that mature/re-price within a specified time-frame are interest rate sensitive. Similarly, any principal repayment of loan is also rate sensitive if the company expects to receive it within the time horizon. This includes final principal repayment and interim instalments. Certain assets and liabilities carry floating rates of interest that vary with a reference rate and hence, these items get re-priced at pre-determined intervals. Such assets and liabilities are rate sensitive at the time of re-pricing.

The Company measures its interest rate exposure to reduce the risk of loss due to interest rate exposure through the following:

- Set and monitor the threshold levels of KRI on monthly basis
- Monitor Interest rate sensitivity as prescribed by RBI under IRS return
- Analyze earnings at risk caused by an upward shift in the yield curve (100 bps parallel shift)
- Computes and monitors Square hedge rate

Management draws comfort from the fact that most of the assets and liabilities of the company create natural interest rate hedge for the company to an extent.

ii. Exposure to interest rate risk

The exposure of the Company to interest rate risk as at 31 March 2020, 31 March 2019 and 1 April 2018 are as below:

	30 September 2019	31 March 2019	1 April 2018
Interest bearing assets			
Loans (A)			
Interest bearing liabilities			
Borrowings (B)			
Net exposure (A-B)			

b) Sensitivity

Profit or loss is sensitive to higher/ lower interest expense from borrowings as a result of changes in interest rates. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

	Impact on profit after tax			Impact on other components of equity		
	31 March 2020	31 March 2019	1 April 2018	31 March 2020	31 March 2019	1 April 2018
100bps upward shift in yield curve						

Notes to the financial statements as at 31st March 2020
(All amounts are INR, unless expressed otherwise)

31 Financial Risk Management (continued)

Financial instruments – Financial risk management (continued)

C. Foreign currency risk

Currency risk is the risk that the value of an receivable/ payable will fluctuate due to changes in foreign exchange rates. Foreign exchange risk arises from future commercial transactions and recognized assets and liabilities denominated in a currency that is not the Company's functional currency (INR).

i. Currency risk management

The company does not have any material foreign currency transactions that would significantly impact the profitability of the company.

ii. Exposure to currency risk

There is no exposure to currency risk

Notes to the financial statements as at 31st March 2020

(All amounts are INR, unless expressed otherwise)

32 First time adoption

Explanation of transition to Ind AS

As stated in Note 1, these are the Company's first financial statements prepared in accordance with Ind AS 1, Preparation and Presentation of financial statements. For the year ended 31 March 2020, the Company had prepared its financial statements in accordance with Companies (Accounting Standards) Rules, 2006, notified under Section 133 of the Act and other relevant provisions of the Act ('Indian GAAP').

The accounting policies set out in Note 1 have been applied in preparing these financial statements for the year ended 31 March 2020 including the comparative information for the year ended 31 March 2019 and the opening Ind AS balance sheet on the date of transition i.e., 1 April 2018.

In preparing its Ind AS balance sheet as at 1 April 2018 and in preparing the comparative information for the year ended 31 March 2019, the company has adjusted the amounts reported previously in financial statement prepared in accordance with Indian GAAP. This note explains the principal adjustments made by the Company in restating Indian GAAP financial statements and how the transition from Indian GAAP to Ind AS has affected the Balance Sheet, financial performance and cash flows.

Optional exemptions availed and mandatory exception

In preparing these financial statements, the Company has applied the below mentioned optional exemptions and mandatory exceptions.

A Optional exemptions availed

1. Property, plant and equipment & Intangible assets

As per Ind AS 101 an entity may elect to:

(i) measure an item of property, plant and equipment at the date of transition at its fair value and use that fair value as its deemed cost at that date

(ii) use a previous GAAP revaluation of an item of property, plant and equipment at or before the date of transition as deemed cost at the date of the revaluation, provided the revaluation was, at the date of the revaluation, broadly comparable to:

– fair value;

– or cost or depreciated cost under Ind AS adjusted to reflect, for example, changes in a general or specific price index.

The elections under (i) and (ii) above are also available for intangible assets that meets the recognition criteria in Ind AS 38, Intangible Assets, (including reliable measurement of original cost); and criteria in Ind AS 38 for revaluation (including the existence of an active market).

(iii) use carrying values of property, plant and equipment, intangible assets and investment properties as on the date of transition to Ind AS (which are measured in accordance with previous GAAP and after making adjustments relating to decommissioning liabilities prescribed under Ind AS 101) if there has been no change in its functional currency on the date of transition.

As permitted by Ind AS 101, the Company has elected to continue with the carrying values under Indian GAAP for all the items of property, plant and equipment. The same election has been made in respect of intangible assets as well.

B Mandatory Exceptions

1. Estimates

As per Ind AS 101, an entity's estimates in accordance with Ind AS at the date of transition to Ind AS at the end of the comparative period presented in the entity's first Ind AS financial statements, as the case may be, should be consistent with estimates made for the same date in accordance with the Indian GAAP unless there is objective evidence that those estimates were in error. However, the estimates should be adjusted to reflect any differences in accounting policies.

As per Ind AS 101, where application of Ind AS requires an entity to make certain estimates that were not required under Indian GAAP, those estimates should be made to reflect conditions that existed at the date of transition (for preparing opening Ind AS balance sheet) or at the end of the comparative period (for presenting comparative information as per Ind AS).

The Company's estimates under Ind AS are consistent with the above requirement. Key estimates considered in preparation of the financial statements that were not required under Indian GAAP are listed below:

- Impairment of financial assets based on the expected credit loss model.

2. Derecognition of financial assets and financial liabilities

As per Ind AS 101, an entity should apply the derecognition requirement in Ind AS 109, Financial Instrument, prospectively for transition occurring on or after the date of transition to Ind AS. However, an entity may apply the derecognition requirement retrospectively from a date chosen by it if the information needed to apply Ind AS 109 to financial assets and financial liabilities derecognised as a result of past transactions was obtained at the time of initially accounting for those transactions

Accordingly, the Company has opted to apply derecognition requirement prospectively for transaction occurring on or after the date of transition.

3. Classification and measurement of financial assets

Ind AS 101 requires an entity to assess classification of financial assets on the basis of facts and circumstances existing as on the date of transition. Further, the standard permits measurement of financial assets accounted at amortised cost based on facts and circumstances existing at the date of transition if retrospective application is impracticable.

Accordingly, the Company has determined the classification of financial assets based on facts and circumstances that exist on the date of transition.

Notes to the financial statements as at 31st March 2020

Profit as per Indian GAAP		(73,357,356)
<i>Adjustments:</i>		
Fair valuation adjustment of staff loans		(155,939)
Employee benefit expenses as per actuarial valuation		(838,205)
Fair value of investment adjustment		(976,257)
Tax impact on above		503,994
Net Profit for the year as per Ind AS (A)		(74,823,763)
Remeasurement gains (losses) on defined benefit plans		56,165
Deferred tax on Remeasurement gains (losses) on defined benefit plans		(14,603)
Other comprehensive income for the year under Ind AS		41,562
Total comprehensive income for the year under Ind AS		(74,865,325)

Fair value of Investments

Under Indian GAAP, This investment is carried at cost less any other-than-temporary diminution in value, determined separately for each individual investment. Under Ind AS Investments are carried at Fair value except investments in

Staff Loans and Advances

Under Indian GAAP, at the time of disbursement of loan entity recognizes loans and advance with the disbursed amount and further at the time of repayments reduce the same amount with outstanding loans and advances. Ind AS 109 requires all financial instruments to be recognized initially at their fair value, which is normally the transaction price. The fair value of such loans is then determined in accordance with Ind AS 113, Fair Value Measurement. The use of a present value technique is considered as an appropriate method for determining fair value of such loans. The difference between the fair value of the loan and the amount lent would be considered as an employee benefit provided by the Entity and should be generally recognized as an expense over the term of the loan. The loan asset is to be classified as measured at amortized cost and the company would be required to accrue interest income at the effective interest rate (i.e. the discount rate used to determine fair value) over the term of the loan.

Deferred Taxes

Indian GAAP requires deferred tax accounting using the statement of profit and loss approach, which focuses on differences between taxable profits and accounting profits for the period. Ind AS 12 requires entities to account for deferred taxes using the balance sheet approach, which focuses on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base. The application of Ind AS 12 approach has resulted in recognition of deferred tax on new temporary differences which was not required under Indian GAAP.

Actuarial gain/losses

Under previous GAAP, actuarial gains and losses were recognised in profit or loss. Under Ind AS, the actuarial gains and losses form part of remeasurement of the net defined benefit liability / asset which is recognised in other comprehensive income. Consequently, the tax effect of the same has also been recognised in other comprehensive income under Ind AS instead of profit or loss.

Statement of cash flows

The transition from Indian GAAP to Ind AS has not had a material impact on the statement of cash flows

FINQUEST FINANCIAL SOLUTIONS PRIVATE LIMITED

Notes forming part of the Standalone Financial Statements For the Year Ended 31st March 2020

1. CORPORATE INFORMATION

Finquest Financial Solutions Pvt. Ltd. ('the Company') is registered as a Non-Banking Financial Company ('NBFC') as defined under section 45-IA of the Reserve Bank of India Act, 1934. The Company is principally engaged in lending and investing activities, holding a Certificate of Registration from the Reserve Bank of India ('RBI')

2. SIGNIFICANT ACCOUNTING POLICIES

I. Statement of compliance

In accordance with the notification issued by the Ministry of Corporate Affairs, the Company has adopted Indian Accounting Standards (referred to as "Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015. The Company has adopted Ind AS from April 1, 2019 with effective transition date as April 1, 2018. These financial statements have been prepared in accordance with Ind AS as notified under the Companies (Indian Accounting Standards) Rules, 2015 read with Section 133 of the Companies Act, 2013 (the "Act"). The transition was carried out from Accounting Principles generally accepted in India as prescribed under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (IGAAP), which was the previous GAAP.

An explanation of how the transition to Ind AS has affected the previously reported financial position, financial performance and cash flows of the Company is provided in Note no 32.

II. Presentation of financial statements

The Balance Sheet, Statement of Profit and Loss and Statement of changes in Equity are prepared and presented in the format prescribed in the Division III of Schedule III to the Companies Act, 2013 ("the Act"). The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS. Amounts in the financial statements are presented in Indian Rupees.

III. Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services at the time of entering into the transaction.

Measurement of fair values:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique.

Fair value for measurement and/or disclosure purposes for certain items in these financial statements is determined considering following methods:

Fair value measurements under Ind AS are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

BJP Bikash
SAP Slates

- a) Level 1: inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at measurement date
- b) Level 2: inputs are inputs, other than quoted prices included within level 1, that are observable for the asset or liability, either directly or indirectly; and
- c) Level 3: inputs are unobservable inputs for the valuation of assets or liabilities that the Company can access at measurement date.

IV. Principles of Consolidation

The consolidated financial statements relate to Finquest financial solutions Pvt Ltd (the "Company") and the Company's share of profit / loss in its subsidiary. The consolidated financial statements have been prepared on the following basis:

- a) The financial statements of subsidiary used in the consolidation are drawn upto the same reporting date as that of the Company i.e., March 31, 2020 or upto the date on which it ceased to be an subsidiary of the Company whichever is earlier.
- b) The consolidated financial statements include the share of profit/ (loss) of subsidiary company, which have been accounted for as per Ind AS 110 (Consolidated Financial Statements).

iv. Principles of Consolidation

The consolidated financial statements relate to Finquest financial solutions Pvt Ltd (the "Company") and the Company's share of profit / loss in its subsidiary. The consolidated financial statements have been prepared on the following basis:

- a) The financial statements of subsidiary used in the consolidation are drawn upto the same reporting date as that of the Company i.e., March 31, 2020 or upto the date on which it ceased to be an subsidiary of the Company whichever is earlier.
- b) The consolidated financial statements include the share of profit/ (loss) of subsidiary company, which have been accounted for as per Ind AS 110 (Consolidated Financial Statements).

V. Use of estimates and judgements

The preparation of financial statements requires the management of the Company to make judgements, assumptions and estimates that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expenses for the reporting period. The application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in the financial statements have been disclosed as applicable in the respective notes to accounts. Accounting estimates could change from period to period. Future results could differ from these estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements Judgements:

Information about judgements made in applying accounting policies that have a most significant effect on the amount recognised in the Standalone financial statements is included as follows:

- Note 11 - classification of financial assets: assessment of the business model within which the assets are held and assessment of whether the contractual terms of the financial asset are solely payments of principal and interest on the principal amount outstanding.

BJP
Bipal
SAP States

Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the year ending March 31, 2020 is included in the following notes: Note 24 : impairment of financial instruments: As per management decision for Loss allowance in case of Non performing assets RBI norms are followed instead of ECL Method

Note 14 : Determination of the fair value of financial instruments with significant unobservable inputs.

Note 16 : Measurement of defined benefit obligations: key actuarial assumptions.

Note 9 : Recognition of deferred tax assets: availability of future taxable profit against which carry forward deferred tax asset can be set off.

Notes 16: recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources.

Note 10 - useful life of property, plant, equipment and intangibles.

VI. Interest

Interest income and expense are recognised using the effective interest method. The effective interest rate (EIR) is the rate that exactly discounts estimated future cash flows through the expected life of the financial instrument to the gross carrying amount of the financial asset or amortised cost of the financial liability.

The calculation of the EIR includes all fees paid or received that are incremental and directly attributable to the acquisition or issue of a financial asset or liability.

The interest income is calculated by applying the EIR to the gross carrying amount of non-credit impaired financial assets (i.e. at the amortised cost of the financial asset before adjusting for any expected credit loss allowance). For credit-impaired financial assets the interest income is calculated by applying the EIR to the amortised cost of the credit-impaired financial assets {i.e. at the amortised cost of the financial asset after adjusting for any expected credit loss allowance (ECLs)}. The Company assesses the collectability of the interest on credit impaired assets at each reporting date. Based on the outcome of such assessment, the Interest income accrued on credit impaired financial assets are either accounted for as income or written off as per the write off policy of the Company.

The interest cost is calculated by applying the EIR to the amortised cost of the financial liability.

Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin.

The 'amortised cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance.

The 'gross carrying amount of a financial asset' is the amortised cost of a financial asset before adjusting for any expected credit loss allowance.

VII. Income from services and distribution of financial products

Revenue from brokerage is recognised when the service is performed. Trail brokerage is recognised at the end of the measurement period when the pre-defined thresholds are met. Revenue is net of applicable indirect taxes and sub-brokerage.

BJP Birla
SAP Slates

The Company could have more than one business model for managing its financial instruments which reflect how the Company manages its financial assets in order to generate cash flows. The Company's business models determine whether cash flows will result from collecting contractual cash flows, selling financial assets or both.

The Company considers all relevant information available when making the business model assessment. The Company takes into account all relevant evidence available such as:

- 1) how the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel and board of directors;
- 2) the risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way in which those risks are managed; and
- 3) how managers of the business are compensated (e.g., whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).
- 4) At initial recognition of a financial asset, the Company determines whether newly recognised financial assets are part of an existing business model or whether they reflect the commencement of a new business model. The Company reassesses its business models each reporting period to determine whether the business model/(s) have changed since the preceding period. For the current and prior reporting period the Company has not identified a change in its business model.

Based on the assessment of the business models, the Company has identified the three following choices of classification of financial assets:

- a) Financial assets that are held within a business model whose objective is to collect the contractual cash flows ("Asset held to collect contractual cash-flows"), and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI), are measured at amortised cost;
- b) Financial assets that are held within a business model whose objective is both to collect the contractual cash flows and to sell the assets, ("Contractual cash flows of Asset collected through hold and sell model") and that have contractual cash flows that are SPPI, are measured at FVTOCI.
- c) All other financial assets (e.g. managed on a fair value basis, or held for sale) and equity investments are measured at FVTPL.

XII. Financial asset at amortised cost

Amortised cost of financial asset is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. For the purpose of SPPI test, principal is the fair value of the financial asset at initial recognition. That principal amount may change over the life of the financial asset (e.g. if there are repayments of principal).

Contractual cash flows that do not introduce exposure to risks or volatility in the contractual cash flows on account of changes such as equity prices or commodity prices and are related to a basic lending arrangement, do give rise to SPPI. An originated or an acquired financial asset can be a basic lending arrangement irrespective of whether it is a loan in its legal form.

The EIR amortisation is included in finance income in the profit and loss statement. The losses arising from impairment are recognised in the profit and loss statement.

Financial asset at fair value through Other Comprehensive Income (FVTOCI)

After initial measurement, basis assessment of the business model as "Contractual cash flows of Asset collected through hold and sell model and SPPI", such financial assets are classified to be measured at FVOCI.

Contractual cash flows that do introduce exposure to risks or volatility in the contractual cash flows due to changes such as equity prices or commodity prices and are unrelated to a basic lending arrangement, do not give rise to SPPI.

BTP
Bijal
SAP
Slates

The EIR amortisation is included in finance income in the profit and loss statement. The losses arising from impairment are recognised in the profit and loss statement. The carrying value of the financial asset is fair valued by discounting the contractual cash flows over contractual tenure basis the internal rate of return of a new similar asset originated in the month of reporting and such unrealised gain/loss is recorded in other comprehensive income (OCI). Where such a similar product is not originated in the month of reporting, the closest product origination is used as a proxy. Upon sale of the financial asset, actual the gain/loss realised is recorded in the profit and loss statement and the unrealised/gain losses recorded in OCI are recycled to the statement of profit and loss.

XIII. Financial asset at fair value through profit and loss (FVTPL)

Financial asset, which does not meet the criteria for categorization at amortized cost or FVOCI, is classified as at FVTPL. In addition, the Company may elect to classify a financial asset, which otherwise meets amortized cost or FVOCI criteria, as FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). Financial assets included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss.

Investment in equity, security receipt, mutual fund, non-cumulative redeemable preference shares and cumulative compulsorily convertible preference shares

Investment in equity, security receipt, mutual fund, non-cumulative redeemable preference shares and cumulative compulsorily convertible preference shares are classified as FVTPL and measured at fair value with all changes recognised in the statement of profit and loss. Upon initial recognition, the Company, on an instrument-by-instrument basis, may elect to classify equity instruments other than held for trading either as FVTOCI or FVTPL. Such election is subsequently irrevocable. If FVTOCI is elected, all fair value changes on the instrument, excluding dividends, are recognized in OCI. There is no recycling of the gains or losses from OCI to the statement of profit and loss, even upon sale of investment. However, the Company may transfer the cumulative gain or loss within other equity upon realisation. Investment in associates:

The Company has elected to measure Investment in associates at cost.

XIV. Reclassifications within classes of financial assets

A change in the business model would lead to a prospective re-classification of the financial asset and accordingly the measurement principles applicable to the new classification will be applied. During the current financial year and previous accounting period there was no change in the business model under which the Company holds financial assets and therefore no reclassifications were made.

XV. Impairment of Financial Asset Impairment approach

The Company is required to recognise expected credit losses (ECLs) based on forward-looking information for all financial assets at amortised cost, lease receivables, debt financial assets at fair value through other comprehensive income, loan commitments and financial guarantee contracts. No impairment loss is applicable on equity investments.

At the reporting date, an allowance (or provision for loan commitments and financial guarantees) is required for the 12 month ECLs. If the credit risk has significantly increased since initial recognition (Stage 1), an allowance (or provision) should be recognised for the lifetime ECLs for financial instruments for which the credit risk has increased significantly since initial recognition (Stage 2) or which are credit impaired (Stage 3), The measurement of ECL is calculated using three main components: (i) probability of default (PD) (ii) loss given default (LGD) and (iii) the exposure at default (EAD). The 12 month ECL is

BTP
SAP State

calculated by multiplying the 12 month PD, LGD and the EAD. The 12 month and lifetime PDs represent the PD occurring over the next 12 months and the remaining maturity of the instrument respectively. The EAD represents the expected balance at default, taking into account the repayment of principal and interest from the balance sheet date

to the default event together with any expected drawdowns of committed facilities. The LGD represents expected losses on the EAD given the event of default, taking into account, among other attributes, the mitigating effect of collateral value at the time it is expected to be realised and the time value of money.

The Company applies a three-stage approach to measure ECL on financial assets accounted for at amortised cost and FVOCI. Assets migrate through the following three stages based on the change in credit quality since initial recognition.

1. Stage 1: 12-months ECL

For exposures where there has not been a significant increase in credit risk since initial recognition and that are not credit impaired upon origination, the portion of the lifetime ECL associated with the probability of default events occurring within the next 12 months is recognized. Exposures with days past due (DPD) less than or equal to 29 days are classified as stage 1. The Company has identified zero bucket and bucket with DPD less than or equal to 29 days as two separate buckets.

2. Stage 2: Lifetime ECL – not credit impaired

For credit exposures where there has been a significant increase in credit risk since initial recognition but that are not credit impaired, a lifetime ECL is recognised. Exposures with DPD equal to 30 days but less than or equal to 89 days are classified as stage 2. At each reporting date, the Company assesses whether there has been a significant increase in credit risk for financial asset since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Company has identified cases with DPD equal to or more than 30 days and less than or equal to 59 days and cases with DPD equal to or more than 60 days and less than or equal to 89 days as two separate buckets.

3. Stage 3: Lifetime ECL – credit impaired

Financial asset is assessed as credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred. For financial asset that have become credit impaired, a lifetime ECL is recognised on principal outstanding as at period end. Exposures with DPD equal to or more than 90 days are classified as stage 3.

A loan that has been renegotiated due to a deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. ECL is recognised on EAD as at period end. If the terms of a financial asset are renegotiated or modified due to financial difficulties of the borrower, then such asset is moved to stage 3, lifetime ECL under stage 3 on the outstanding amount is applied. The Company assesses when a significant increase in credit risk has occurred based on quantitative and qualitative assessments. Exposures are considered to have resulted in a significant increase in credit risk and are moved to Stage 2 when:

1. Quantitative test: Accounts that are 30 calendar days or more past due move to Stage 2 automatically. Accounts that are 90 calendar days or more past due move to Stage 3 automatically.

BJP

SAP

2. Qualitative test: Accounts that meet the portfolio's 'high risk' criteria and are subject to closer credit monitoring. High risk customers may not be in arrears but either through an event or an observed behaviour exhibit credit distress.

3. Reversal in Stages: Exposures will move back to Stage 2 or Stage 1 respectively, once they no longer meet the quantitative criteria set out above. For exposures classified using the qualitative test, when they no longer meet

the criteria for a significant increase in credit risk and when any cure criteria used for credit risk management are met. The definition of default for the purpose of determining ECLs has been aligned to the Reserve Bank of India definition of default, which considers indicators that the debtor is unlikely to pay and is no later than when the exposure is more than 90 days past due.

The Company continues to incrementally provide for the asset post initial recognition in Stage 3, based on its estimate of the recovery. Whereas the Management has provided for/ written off the entire receivables in the current financial year following RBI norms for non performing assets instead of ECL method :

Product	Overdue criteria
Loan against property	15 months and above
Construction equipment, auto, commercial vehicles, two wheeler and personal loan	10 months and above
Tractor/agri products	6 months and above
Consumer durables	5 months and above

The measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions and reasonable and supportable forecasts. The measurement of ECL involves increased complexity and judgement, including estimation of PDs, LGD, a range of unbiased future economic scenarios, estimation of expected lives, and estimation of EAD and assessing significant increases in credit risk.

XVI. Impairment of Trade receivable and Operating lease receivable

Impairment allowance on trade receivables is made on the basis of life time credit loss method, in addition to specific provision considering the uncertainty of recoverability of certain receivables.

XVII. Modification and De-recognition of financial assets

Modification of financial assets
A modification of a financial asset occurs when the contractual terms governing the cash flows of a financial asset are renegotiated or otherwise modified between initial recognition and maturity of the financial asset. A modification affects the amount and/or timing of the contractual cash flows either immediately or at a future date. The Company renegotiates loans to customers in financial difficulty to maximize collection and minimize the risk of default. A loan forbearance is granted in cases where although the borrower made all reasonable efforts to pay under the original contractual terms, there is a high risk of default or default has already happened and the borrower is expected to be able to meet the revised terms. The revised terms in most of the cases include an extension of the maturity of the loan, changes to the timing of the cash flows of the loan (principal and interest repayment), reduction in the amount of cash flows due (principal and interest forgiveness). Such accounts are classified as stage 3 immediately upon such modification in the terms of the contract. Not all changes in terms of loans are considered as renegotiation and changes in terms of a class

BTP
SAP
Slates

of obligors that are not overdue is not considered as renegotiation and is not subjected to deterioration in staging.

XVIII. De-recognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- 1) the rights to receive cash flows from the asset have expired, or
- 2) the Company has transferred its rights to receive cash flows from the asset and substantially all the risks and rewards of the asset, or the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

XIX. Write-off

Impaired loans and receivables are written off, against the related allowance for loan impairment on completion of the Company's internal processes and when the Company concludes that there is no longer any realistic prospect of recovery of part or all of the loan. For loans that are individually assessed for impairment, the timing of write off is determined on a case by case basis. A write-off constitutes a de-recognition event. The Company has right to apply enforcement activities to recover such written off financial assets. Subsequent recoveries of amounts previously written off are credited to the income statement.

XX. Presentation of ECL allowance for financial asset:

Type of Financial asset	Disclosure
Financial asset measured at amortised cost	shown separately under the head "provisions" and not as a deduction from the gross carrying amount of the assets
Financial assets measured at FVTOCI	
Loan commitments and financial guarantee contracts	shown separately under the head "provisions"

Where a financial instrument includes both a drawn and an undrawn component and the Company cannot identify the ECL on the loan commitment separately from those on the drawn component, the Company presents a combined loss allowance for both components under "provisions".

XXI. Financial liability, Equity and Compound Financial Instruments Financial liabilities and equity

Debt and equity instruments that are issued are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

A. Financial liabilities

A financial liability is a contractual obligation to deliver cash or another financial asset or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the Company or a contract that will or may be settled in the Company's own equity instruments and is a non-derivative contract for which the Company is or may be obliged to deliver a variable number of its own equity instruments, or a derivative contract over own equity that will or may be settled other than by the

Bipat
BTP

SAP Slates

exchange of a fixed amount of cash (or another financial asset) for a fixed number of the Company's own equity instruments.

B. Classification

The Company classifies its financial liability as "Financial liability at amortised cost" except for financial liability at fair value through profit and loss (FVTPL).

C. Initial recognition and measurement

Financial liability is recognised initially at cost of acquisition net of transaction costs and incomes that is attributable to the acquisition of the financial liability. Cost equates the fair value on acquisition. Company may irrevocably designate a financial liability that meet the amortised cost as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch (referred to as the fair value option).

D. De-recognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

E. Equity

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.

No gain/loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

a) Compound instruments

The component parts of compound instruments (e.g. cumulative compulsorily convertible preference shares CCCPS) issued by the Company are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. A conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently re-measured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to share capital and share premium. Where the conversion option remains unexercised at the maturity date of the convertible note, the balance recognised in equity will be transferred to retained profits. No gain/loss is recognised in profit or loss upon conversion or expiration of the conversion option.

A Cumulative Compulsorily Convertible Preference Shares (CCCPS), with an option to holder to convert the instrument in to variable number of equity shares of the entity upon redemption is classified as a financial liability and dividend including dividend distribution tax is accrued on such instruments and recorded as finance cost.

BJP
BJP

States
SAP

b) Cash, Cash equivalents and bank balances

Cash, Cash equivalents and bank balances include fixed deposits, margin money deposits, and earmarked balances with banks are carried at amortised cost. Short term and liquid investments being subject to more than insignificant risk of change in value, are not included as part of cash and cash equivalents.

XXI. Property, plant and equipment

a) Tangible

Tangible property, plant and equipment (PPE) acquired by the Company are reported at acquisition cost less accumulated depreciation and accumulated impairment losses, if any. The acquisition cost includes any cost attributable for bringing asset to its working condition net of tax/duty credits availed, which comprises of purchase consideration, other directly attributable costs of bringing the assets to their working condition for their intended use. PPE is recognised when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

b) Capital work-in-progress

PPE not ready for the intended use on the date of the Balance Sheet are disclosed as “capital work-in-progress” and carried at cost, comprising direct cost, related incidental expenses and attributable interest.

c) Intangible

Intangible assets are recognised when it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost net of tax/duty credits availed, if any, less accumulated amortisation and cumulative impairment. Administrative and other general overhead expenses that are specifically attributable to acquisition of intangible assets are allocated and capitalised as a part of the cost of the intangible assets. Expenses on software support and maintenance are charged to the Statement of Profit and Loss during the year in which such costs are incurred.

d) Intangible assets under development

Intangible assets not ready for the intended use on the date of Balance Sheet are disclosed as “Intangible assets under development”.

e) Depreciation and Amortisation

Depreciable amount for tangible property, plant and equipment is the cost of an asset, or other amount substituted for cost, less its estimated residual value. The residual value of each asset given on Operating lease is determined at the time of recording of the lease asset. If the residual value of the Operating lease asset is higher than 5%, the Company has a justification in place for considering the same.

Depreciation on tangible property, plant and equipment deployed for own use has been provided on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013 except in respect of Buildings, Computer Equipment networking assets, electrical installation and equipment and Vehicles, in whose case the life of the assets has been assessed based on the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, etc.

Depreciation on tangible property, plant and equipment deployed on operating lease has been provided on the straight-line method over the primary lease period of the asset. Depreciation method is reviewed

Bipal
BTP

SAP States

at each financial year end to reflect expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life and residual values are also reviewed at each financial year end

with the effect of any change in the estimates of useful life/residual value is accounted on prospective basis. Depreciation for additions to/deductions from, owned assets is calculated pro rata to the remaining period of use. Depreciation charge for impaired assets is adjusted in future periods in such a manner that the revised carrying amount of the asset is allocated over its remaining useful life. All capital assets with individual value less than Rs. 5,000 are depreciated fully in the year in which they are purchased.

Purchased software / licenses are amortised over the estimated useful life during which the benefits are expected to accrue, while Goodwill if any is tested for impairment at each Balance Sheet date. The method of amortisation and useful life are reviewed at the end of each accounting year with the effect of any changes in the estimate being accounted for on a prospective basis. Amortisation on impaired assets is provided by adjusting the amortisation charge in the remaining periods so as to allocate the asset's revised carrying amount over its remaining useful life.

Estimated useful life considered by the Company are:

Asset	Estimated Useful Life
Leasehold Improvements	As per lease period
Construction Equipment	2 to 13.5 years
Furniture and Fixtures	Owned: 10 years
	Leased: 3 to 7 years
Computer Equipment	Owned: 3 to 4 years
	Leased: 2 to 4 years
Office Equipment	Owned: 5 years
	Leased: 3 to 5 years
Vehicles	Owned: 4 years
	Leased: 1 to 5 years
Software Licenses	Owned: 1 to 10 years
	Leased: 1 to 3 years
Buildings	25 years
Plant & Machinery	Owned: 10 years
	Leased: 2 to 15 years
Railway Wagons	Leased: 6 years
Electrical Installation & Equipment	Leased: 3 to 6 years
Networking Assets	Leased: 2 to 4 years

f) Reclassification to Investment property

Properties held to earn rentals and/or capital appreciation are classified as Investment properties and measured and reported at cost, including transaction costs. When the use of an existing property changes from owner-occupied to investment property, the property is reclassified as investment property at its carrying amount on the date of reclassification.

B. Patel
BJP

SAP

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on de-recognition of property is recognised in the Statement of Profit and Loss in the same period.

g) Impairment of assets

Upon an observed trigger or at the end of each accounting year, the Company reviews the carrying amounts of its PPE, investment property and intangible asset to determine whether there is any indication that the asset have suffered an impairment loss. If such indication exists, the PPE, investment property and intangible assets are tested for impairment so as to determine the impairment loss, if any.

Impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If recoverable amount of an asset is estimated to be less than its carrying amount, such deficit is recognised immediately in the Statement of Profit and Loss as impairment loss and the carrying amount of the asset is reduced to its recoverable amount. When an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss is recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit and Loss.

h) De-recognition of property, plant and equipment and intangible asset

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss. An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

XXII. Non-Current Assets held for sale

Non-current assets are classified as held for sale if their carrying amount is intended to be recovered principally through a sale (rather than through continuing use) when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such asset and the sale is highly probable and is expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets classified as held for sale are measured at lower of their carrying amount and fair value less costs to sell.

The Company has a policy to make impairment provision at one third of the value of the Asset for each year upon completion of three years upto the end of five years.

Bipal
BTP

SAP
Slates

XXIII. Employee Benefits

Defined Employee benefits include provident fund, superannuation fund, employee state insurance scheme, Defined contribution benefits includes gratuity fund, compensated absences, long service awards and post-employment medical benefits.

a) Defined contribution plan

The eligible employees of the Company are entitled to receive benefits under the provident fund, a defined contribution plan, in which both employees and the Company make monthly contributions at a specified percentage of the covered employees' salary (currently 12% of employees' salary), which is recognised as an expense in the Statement of Profit and Loss in the year in which they occur. The contributions as specified under the law are paid to the provident fund set up as irrevocable trust by the Company. The Company is generally liable for annual contributions and any deficiency in interest cost compared to interest computed based on the rate of interest declared by the Central Government under the employee provident scheme, 1952 is recognised as an expense in the year in which it is determined.

The Company's contribution to superannuation fund and employee state insurance scheme are considered as defined contribution plans and are charged as an expense in the Statement of Profit and Loss based on the amount of contribution required to be made and when services are rendered by the employees.

b) Defined benefit plans

For defined benefit plans in the form of gratuity, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each Balance Sheet date. Re-measurement of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised immediately in OCI. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the schemes.

c) Short-term employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the year in which the employee renders the related service.

The cost of short-term compensated absences is accounted as under:

- (a) in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- (b) in case of non-accumulating compensated absences, when the absences occur.

d) Long-term employee benefits

Compensated absences which are not expected to occur within twelve months after the end of the year in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date less the fair value of the plan assets out of which the obligations are

Biswal
BJP

SAP Slates

expected to be settled. Long term service awards are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date.

e) Share based payment transaction

The stock options of the Parent Company is granted to employees pursuant to the Company's Stock Options Schemes, are measured at the fair value of the options at the grant date. The amount recognised as expense is based on the estimate of the number of options for which the related service and non-market and non-market vesting conditions are expected to be met, such that the amount ultimately recognised as an expense is based on the number of options that do meet the related service and non-market vesting conditions at the vesting date. For share-based options with non-vesting conditions, the grant date fair value of the share-based payment is measured to reflect such conditions and there is no true-up for differences between expected and actual outcomes. The fair value of the options is treated as discount and accounted as employee compensation cost over the vesting period on a straight line basis. The amount recognised as expense in each year is arrived at based on the number of grants expected to vest. If a grant lapses after the vesting period, the cumulative discount recognised as an expense in respect of such grant is transferred to the general reserve within other equity, which a free reserve in nature.

XXIV. Securities premium account

The Company records premium on account of

1. On issuance of new equity shares;
2. On conversion of CCCPS into equity shares

The issue expenses of securities which qualify as equity instruments are written off against securities premium account.

XXV. Foreign currencies transactions

Transactions in currencies other than the Company's functional currency are recorded on initial recognition using the exchange rate at the transaction date. At each Balance Sheet date, foreign currency monetary items are reported at the rates prevailing at the year end. Non-monetary items that are measured in terms of historical cost in foreign currency are not retranslated.

Exchange differences that arise on settlement of monetary items or on reporting of monetary items at each Balance Sheet date at the closing spot rate are recognised in the Statement of Profit and Loss in the period in which they arise.

XXVI. Operating Segments

The Company's main business is financing by way of loans for retail and corporate borrowers in India. The Company's operating segments consist of "Financing Activity", " Investment Activity" and "Others". All other activities of the Company revolve around the main businesses. This in the context of Ind AS 108 – operating segments reporting are considered to constitute reportable segment. The Chief Operating Decision Maker (CODM) of the Company is the Board of Directors. Operating segment disclosures are consistent with the information reviewed by the CODM.

An operating segment is a component of the company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the company's other components, and for which discrete financial information is available. Accordingly all operating segment's operating results of the Company are reviewed regularly by the Board of Directors to make decisions about resources to be allocated to the segments and assess their performance.

Prithvi
BJP

SAP *States*

The "Financing Activity" segment consists of asset financing, term loans (corporate and retail), channel financing, credit substitutes, investments linked to/arising out of lending business and bill discounting. The "Investment Activity" segment includes corporate investments and "Others" segment primarily includes advisory services, wealth management, distribution of financial products and leasing. Revenue and expense directly attributable to segments are reported under each operating segment. Expenses not directly identifiable to each of the segments have been allocated to each segment on the basis of associated revenues of each segment. All other expenses which are not attributable or allocable to segments have been disclosed as un-allocable expenses. Assets and liabilities that are directly attributable to segments are disclosed under each reportable segment. All other assets and liabilities are disclosed as un-allocable.

XXVII. Investments in Associates

The Company is required to measure investment in associate at cost plus profit pick up in case of associates.

XXVIII. Earnings per share

Basic earnings per share has been computed by dividing net income by the weighted average number of shares outstanding during the year. Partly paid up shares are included as fully paid equivalents according to the fraction paid up.

XXIX. Taxation Income Tax

Income tax expense comprises current and deferred taxes. Income tax expense is recognized in the Statement of Profit and Loss except when they relate to items that are recognized outside profit or loss (whether in other comprehensive income or directly in equity), in which case tax is also recognized outside profit or loss.

a) Current Tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax law) enacted or substantively enacted by the reporting date.

Current tax asset and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

b) Deferred Tax

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilized business loss and depreciation carry-forwards and tax credits. Such deferred tax assets and liabilities are computed separately for each taxable entity. Deferred tax assets are recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilized.

Deferred tax assets and liabilities are measured based on the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

B. J. P.
- B. J. P.

SA P. B. B.

XXX. Goods and Services Input Tax Credit

Goods and Services tax input credit is accounted for in the books in the period in which the supply of goods or service received is accounted and when there is no uncertainty in availing/utilising the credits.

XXXI. Provisions, contingent liabilities and contingent assets

Provisions are recognised only when:

- (i) an entity has a present obligation (legal or constructive) as a result of a past event; and
- (ii) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- (iii) a reliable estimate can be made of the amount of the obligation

Provision is measured using the cash flows estimated to settle the present obligation and when the effect of time value of money is material, the carrying amount of the provision is the present value of those cash flows. Reimbursement expected in respect of expenditure required to settle a provision is recognised only when it is virtually certain that the reimbursement will be received.

Contingent liability is disclosed in case of:

- (i) a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and
- (ii) a present obligation arising from past events, when no reliable estimate is possible. Contingent assets are disclosed where an inflow of economic benefits is probable. Provisions, contingent liabilities and contingent assets are reviewed at each Balance Sheet date.

Where the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under such contract, the present obligation under the contract is recognised and measured as a provision. Contingent assets are not recognised in the financial statements

XXXII. Commitments

Commitments are future liabilities for contractual expenditure, classified and disclosed as follows:

- a) estimated amount of contracts remaining to be executed on capital account and not provided for;
- b) uncalled liability on shares and other investments partly paid;
- c) funding related commitment to associate; and
- d) other non-cancellable commitments, if any, to the extent they are considered material and relevant in the opinion of management.
- e) Other commitments related to sales/procurements made in the normal course of business are not disclosed to avoid excessive details.
- f) Commitments under Loan agreement to disburse Loans
- g) Lease agreements entered but not executed

XXXIII. Statement of Cash Flows

Statement of Cash Flows is prepared segregating the cash flows into operating, investing and financing activities. Cash flow from operating activities is reported using indirect method adjusting the net profit for the effects of:

- i. changes during the period in operating receivables and payables transactions of a non-cash nature;
- ii. non-cash items such as depreciation, provisions, deferred taxes, unrealised foreign currency gains and losses, and undistributed profits of associates and joint ventures; and
- iii. all other items for which the cash effects are investing or financing cash flows.

Cash and cash equivalents (including bank balances) shown in the Statement of Cash Flows exclude items which are not available for general use as on the date of Balance Sheet.

SAP *Spates*

XXXIV. Dividend payable (including dividend distribution tax)

Interim dividend declared to equity shareholders, if any, is recognised as liability in the period in which the said dividend has been declared by the Directors. Final dividend declared, if any, is recognised in the period in which the said dividend has been approved by the Shareholders.

XXXV. FIRST TIME ADOPTION OF IND AS (read with note 2(i))

The Company has adopted Indian Accounting Standards (Ind AS) as notified by the Ministry of Corporate Affairs with effect from 1st April, 2019, with a transition date of 1st April, 2018. The financial statements for the year ended March 31, 2020 are the first financial statements, the Company has prepared under Ind AS. For all periods up to and including the year ended 31st March, 2019, the Company prepared its financial statements in accordance with the accounting standards notified under the section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 ('Previous GAAP'). The adoption of Ind AS has been carried out in accordance with Ind AS 101, First-time Adoption of Indian Accounting Standards. Ind AS 101 requires that all Ind AS standards and interpretations that are issued and effective for the first Ind AS financial statements be applied retrospectively and consistently for all financial years presented. Accordingly, the Company has prepared financial statements which comply with Ind AS for the year ended March 31, 2020 and the opening Ind AS Balance Sheet as at April 1, 2018, the date of transition to Ind AS and also as at March 31, 2019.

In preparing these Ind AS financial statements, the Company has availed certain exemptions and exceptions in accordance with Ind AS 101, as in Note 32. The resulting difference between the carrying values of the assets and liabilities in the financial statements as at the transition date under Ind AS and Previous GAAP have been recognised directly in equity (retained earnings or another appropriate category of equity). **Note 32** explains the adjustments made by the Company in restating its financial statements prepared under previous GAAP, including the statement of profit and loss account for the year ended March 31, 2020 and the Balance Sheet as at April 1, 2018 and as at March, 31 2019.

DIRECTORS' REPORT

To
The Members,

FINQUEST FINANCIAL SOLUTIONS PRIVATE LIMITED

Your Directors have pleasure in presenting their Directors Report on the business and operations of your company together with Audited Accounts for the year ended 31st March 2020.

1. FINANCIAL RESULTS:

The Company's financial performance, for the year ended 31st March, 2020 is summarized below:

(Amount In Rs.)

Particulars	Standalone		Consolidated	
	For the year ended 31 st March, 2020	For the year ended 31 st March, 2019	For the year ended 31 st March, 2020	For the year ended 31 st March, 2019
Total Revenue	35,47,53,564	85,36,32,970	35,47,53,564	85,36,32,970
Total Expenses	52,93,48,545	92,94,13,393	53,04,42,045	92,94,21,124

<u>Less: Tax Expenses</u>	-	-	-	-
1. Current Tax	55,19,638	-	55,19,638	-
2. Earlier Year's Tax	-	-	-	-
3. Provision for Tax	-	-	-	-
4. Deferred Tax	17,57,748	(9,56,660)	17,57,748	(9,56,660)
Total Tax Expense	72,77,386	(9,56,660)	72,77,386	(9,56,660)
Net Profit/ (Loss) after Tax	(18,18,72,367)	(7,48,23,763)	(18,29,65,867)	(7,48,31,494)

2. RESULTS OF OPERATIONS AND THE STATE OF THE COMPANY'S AFFAIRS:

Your Company has reported a Net Loss of Rs. 18,18,72,367/- (Rupees Eighteen Crore Eighteen Lakhs Seventy Two Thousand Three Hundred and Sixty Seven Only) for the financial year 2019-20.

3. NOVEL CORONA VIRUS PANDEMIC (COVID-19):

The World Health Organization declared a global pandemic of the Novel Coronavirus disease (COVID-19) on February 11, 2020. The COVID-19 pandemic developed rapidly into a global crisis, forcing governments to enforce lock downs of all economic activities. Measures taken to contain the spread of the virus, including travel bans, quarantines, social distancing, and closures of non-essential services have triggered significant disruptions to businesses, resulting in an economic slowdown. The Company is continuously monitoring the evolving COVID-19 pandemic closely and responding appropriately in accordance with relevant government requirements.

4. RESERVE & SURPLUS:

During the year under review, no amount was transferred to General Reserve.

5. DIVIDEND:

Due to inadequacy of profits, the Directors do not recommend any dividend for the Financial Year 2019-20.

6. SHARE CAPITAL:

The Authorized Share Capital of the Company is Rs. 42,00,00,000/- (Rupees Forty Two Crores Only) divided into 4,20,00,000 (Four Crore Twenty Lakhs) Equity Shares of Rs.10/- each.

The paid-up share capital of the Company is Rs. 31,90,00,000/- (Rupees Thirty One Crore and Ninety Lakhs Only) divided into 3,19,00,000 (Three Crore Nineteen Lakhs) Equity Shares of Rs.10/- each.

There was no change in share capital of the Company during the year under review.

7. INTERNAL FINANCIAL CONTROLS AND RISK MANAGEMENT:

The Company has in place adequate internal financial controls with reference to financial statement. The Company's internal control system is designed to ensure operational efficiency, protection and conservation of resources, accuracy and promptness in financial reporting and compliance with laws and regulations. The internal control system is also supported by an internal audit process.

Risk management is an integral part of the Company's business strategy that seeks to minimize adverse impact on business objectives and capitalise on opportunities. The Risk Committee oversees the risk management framework of the Company through regular and proactive intervention by identifying risks and formulating mitigation plans.

8. BOARD OF DIRECTORS & KEY MANAGERIAL PERSONNEL:

The Board of Directors of the Company comprises of 3 Directors.

During the Year following 3 (Three) Independent directors were appointed w.e.f. from 23/07/2020.

1. Bharat Jamnadas Dattani (DIN: 00608198)
2. Dhiren Shah Shevantilal (DIN: 01149436)
3. Sudha Bhushan (DIN: 01749008)

It is further confirmed that none of the above directors are disqualified under section 164(2) of the Companies Act, 2013.

9. NOMINATION & REMUNERATION POLICY:

During the Year three Independent Directors were appointed on the Board and thus the Nomination & Remuneration policy was reconstituted with the following members.

Mr. Dhiren Shah	Independent Director	Chairman
Ms. Sudha Bhusan	Independent Director	Member
Mr. Hardik Bharat Patel	Director	Member

10. AUDIT COMMITTEE:

During the Year three Independent Directors were appointed on the Board and thus the Audit Committee was reconstituted with the following members.

Mr. Bharat Dattani	Independent Director	Chairman
Ms. Sudha Bhusan	Independent Director	Member
Mr. Bharat Jayantilal Patel	Director	Member

11. BOARD MEETINGS AND ANNUAL GENERAL MEETING:

During the year under review 26 (Twenty Six) Board meetings were held:

The intervening gap between the meetings was within the period prescribed under the Companies Act, 2013.

The Extra-Ordinary General meeting was held on 19th August 2019.

The Meeting of Debenture Holders was held on 11th September 2019.

The Annual General Meeting (AGM) of the Company was held on 30th September 2019.

12. MATERIAL CHANGES AND COMMITMENTS AFFECTING THE FINANCIAL POSITION OF THE COMPANY:

No material changes and commitments affecting the financial position of the Company occurred between the end of the financial year to which this financial statement relate and the date of this report.

13. CHANGE IN NATURE OF THE BUSINESS:

During the year under review, there was no change in Nature of the Business of the Company.

14. SIGNIFICANT OR MATERIAL ORDERS PASSED BY THE REGULATORS OR COURT OR TRIBUNALS IMPACTING THE GOING CONCERN STATUS OF THE COMPANY:

No significant or material orders were passed by the Regulators or Courts or Tribunals which impact the going concern status and Company's Operations in future.

15. EXTRACT OF ANNUAL RETURN:

An extract of the Annual Return in Form MGT-9 pursuant to Section 92(3) of the Act and Rule 12 of the Companies (Management and Administration) Rules, 2014 is annexed as Annexure-I to this Report.

16. PUBLIC DEPOSITS:

The Company has not accepted any deposits from the public falling within the ambit of Section 73 of the Act read with the Companies (Acceptance of Deposits) Rules, 2014.

17. PARTICULARS OF LOANS, GUARANTEE OR INVESTMENTS:

The Company has not made any investment, given guarantee and securities under Section 186 of the Companies Act, 2013.

18. PARTICULARS OF CONTRACTS OR ARRANGEMENTS MADE WITH RELATED PARTIES:

During the year under review, the Company did not enter into any agreements/contracts with related parties. Accordingly, the disclosure of Related Party Transactions as required under Section 134(3) (h) of the Companies Act, 2013, in Form AOC-2 is not applicable as all the transactions have been made on the arm's length basis in the ordinary course of the business of the company.

19. STATUTORY AUDITORS AND THEIR REPORT:

M/s. R. C. Jain & Associates LLP (FRN: 103952W/W100156), Chartered Accountants, were appointed as Statutory Auditors of the Company for a period of five years by the shareholders at the Annual General Meeting (AGM) held on September 30, 2016. The Statutory Auditors are eligible and not disqualified to continue as Statutory Auditors of the Company.

In accordance with Section 40 of the Companies Amendment Act, 2017, enforced on 7th May, 2018 by the Ministry of Corporate Affairs, the appointment of Statutory Auditors is no longer required to be ratified at every Annual General Meeting.

The Report given by the Auditors on the financial statement of the Company forms a part of this Report.

The Auditors' Report does not contain any qualification, reservation, adverse remark or disclaimer.

20. CORPORATE SOCIAL RESPONSIBILITY INITIATIVES (CSR):

During the Year three Independent Directors were appointed on the Board and thus the Corporate Social Responsibility Committee was reconstituted with the following members.

Ms. Sudha Bhusan	Independent Director	Chairman
Mr. Hardik Bharat Patel	Director	Member
Mr. Bharat Jayantilal Patel	Director	Member

The Company is not obligated to spend and amount on the CSR Activities for the financial year 2019-20.

21. DIRECTORS RESPONSIBILITY STATEMENT:

In terms of Section 134(5) of the Companies Act, 2013, the Directors state that:

- (a) in the preparation of the annual accounts, the applicable accounting standards had been followed along with proper explanation relating to material departures;
- (b) the directors had selected such accounting policies and applied them consistently and made judgments and estimates that are reasonable and prudent so as to give a true and fair view of the state of affairs of the company at the end of the financial year and of the profit and loss of the company for the year under review;
- (c) the directors have taken proper and sufficient care for the maintenance of adequate accounting records in accordance with the provisions of the Companies Act, 2013, for safeguarding the assets of the company and for preventing and detecting fraud and other irregularities;
- (d) the directors have prepared the annual accounts on a going concern basis; and
- (e) the directors had laid down internal financial controls to be followed by the company and that such internal financial controls are adequate and were operating effectively.
- (f) the directors had devised proper systems to ensure compliance with the provisions of all applicable laws and that such systems were adequate and operating effectively.

19. SUBSIDIARIES COMPANIES:

M/s. Krihaan Texchem Private Limited is a Wholly Owned Subsidiary of the Company.

20. CONSERVATION OF ENERGY, TECHNOLOGY ABSORPTION & RESEARCH & DEVELOPMENT:

During the period under review, there was no activity, hence this clause is not applicable.

21. REPORTING OF FRAUD BY AUDITORS:

There are no instances of fraud reported by the Auditors during the financial year 2019-20.

22. FOREIGN EXCHANGE EARNINGS AND OUTGO:

During the year, the foreign exchange earned was Rs. Nil and the foreign exchange expenditure was Rs. NIL.

23. COMPANY'S POLICY RELATING TO DIRECTORS APPOINTMENT, PAYMENT OF REMUNERATION AND DISCHARGE OF THEIR DUTIES:

The provisions of Section 178(1) relating to constitution of Nomination & Remuneration Committee are not applicable to the Company.

24. DISCLOSURE UNDER SEXUAL HARASSMENT OF WOMEN AT WORKPLACE (PREVENTION, PROHIBITION & REDRESSAL) ACT, 2013:

Your Company has in place of Sexual Harassment Policy for prevention of Sexual Harassment in line with the "The Sexual Harassment of Women at workplace (Prevention and Prohibition and Redressal) Act & Rules, 2013." To create a robust framework for this policy dissemination, the Company from time to time undertakes awareness creation and periodic reiteration among all executives. Internal Complaints committees are set up at shop floor level to redress any complaints received and are monitored by women line supervisor. All employees are covered under the policy.

During the year, the Company has not received any complaints

25. SECRETARIAL STANDARDS:

During the year under review, the Company has complied with the applicable Secretarial Standards issued by the Institute of Company Secretaries of India.

26. ACKNOWLEDGEMENTS:

Your Directors would like to express their appreciation to the Central, State & Local Government, Authorities, Regulatory bodies, Financial Institutions, Banks, Customers and the Shareholders of the Company for their continued support and co-operation.

FOR FINQUEST FINANCIAL SOLUTIONS PRIVATE LIMITED

HARDIK BHARAT PATEL
DIRECTOR
DIN: 00590663

INDEPENDENT AUDITORS' REPORT

To the Members of Finquest Financial Solutions Private Limited

Report on the Ind AS Financial Statements

1. We have audited the accompanying Ind AS Consolidated financial statements of Finquest Financial Solutions Private Limited ("the Company"), its subsidiary which comprise the Consolidated Balance Sheet as at 31st March 2020, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Statement of Cash Flows and the Statement of Changes in Equity for the year then ended, and a summary of the significant accounting policies and other explanatory information.

Opinion

2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS Consolidated financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including the Ind AS, of the state of affairs (financial position) of the Company as at 31st March, 2020, and its Consolidated Profit (financial performance including other comprehensive income), its Consolidated Cash Flows and the Changes in Equity for the year ended on that date other than the fact that company has recognized the loss allowance on Non-Performing assets as per RBI prescribed norms for NON-BANKING FINANCIAL COMPANIES instead of expected credit loss allowance as given under Indian Accounting Standard 109, (IND AS 109) "Classification and measurement of Financial Assets and Financial Liabilities" and Indian Accounting Standard 107 "Financial Instruments : Disclosures".

Basis for Opinion

3. We conducted our audit of the Ind AS Consolidated Financial Statements in accordance with the Standards on Auditing ("SAs") specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Ind AS Consolidated Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the independence requirements that are relevant to our audit of

the Ind AS Consolidated Financial Statements under the provisions of the Act and the Rules made there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Other Matters

4. The audit of the Financial Statements has been conducted after considering the impact of COVID-19 on the business and appropriate disclosures, wherever applicable, have been made in the Notes annexed to the Financial Statements.

Management's Responsibility for the Financial Statements

5. The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS Consolidated financial statements that give a true and fair view of the State of Affairs (financial position), Consolidated Profit or Loss (financial performance including other comprehensive income), Cash Flows and Changes in Equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Act, read with the relevant rules issued thereunder.
6. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS Consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

7. Our responsibility is to express an opinion on these Ind AS Consolidated financial statements based on our audit.
8. We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made there under.

9. We conducted our audit of the Ind AS Consolidated financial statements in accordance with the Standards on Auditing specified under section 143 (10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Ind AS Consolidated Financial Statements are free from material misstatement.
10. An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the Ind AS financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS Consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the Ind AS Consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the Ind AS Consolidated financial statements.
11. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Report on Other Legal and Regulatory Requirements

12. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of section 143(11) of the Act, we give in Annexure statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable – **Not Applicable**.
13. As required by section 143(3) of the Act, we report that:
 - a. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b. In our opinion, proper books of account as required by law have been kept by the company so far as it appears from our examination of those books.
 - c. The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss, the Consolidated Statement of Cash Flows and the Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
 - d. In our opinion, the aforesaid Ind AS Consolidated financial statements comply with the Indian Accounting Standards prescribed under Section 133 of the Act, read with the relevant rules issued thereunder.

- e. On the basis of the written representations received from the directors as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164(2) of the Act.
- f. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us :
- i. The Company does not have any pending litigations which would impact its financial position.
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
 - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the company.

Balance as at 31 March 2020	39,139,504	1,334,959,712	(169,413,401)	170,138	1,204,855,953

Note :

Nature and Purpose of Reserves

1. Statutory Reserve

In terms of Section 45-IC of the RBI Act, NBFCs are required to create a reserve fund and transfer therein a sum not less than twenty per cent of its net profit every year. The above requirement is to give intrinsic strength to the balance sheets of the companies. This reserve could be used for purposes as stipulated by the Reserve Bank of India from time to time.

2. Securities Premium

Securities premium reserve is used to record the premium on issue of shares. The reserve can be utilised only for limited purposes such as issuance of bonus shares in accordance with the provisions of the Companies Act, 2013

3. Retained Earnings

Retained earnings are the profits that a company has earned to date, less any dividends or other distributions paid to investors.

4. Other Comprehensive Income (OCI)

Other Comprehensive Income refers to items of income and expenses that are not recognised as a part of the profit and loss account. However, the entity may transfer those amounts recognised in other comprehensive income within equity. The gain/loss on actuarial valuation of gratuity liability is considered in other comprehensive income.

30. In the past, the Company had acquired certain stressed loan assets by way of assignment, with a view to recover/realise these debts ('transaction'), the corporate debtor of which went into liquidation process under the Insolvency and Bankruptcy Code, 2016 ('Code'). The Company exercised its option under section 52(1)(b) of the Code to realise its security interest (assets held as security) on its own. During the year, the Liquidator, by his Order dated 19.02.2020, admitted the Company's exclusive claim to its security interest, entitling the Company to enforce, realise, settle, compromise or deal with those assets under section 52(4) of the Code. Accordingly, these assets are shown as 'Assets acquired in partial satisfaction of debts-claim' as part of the Financial Assets, at their net realisable value (NRV), which is reckoned at the price they would fetch on their disposal, but after deducting therefrom prior costs/charges statutorily payable out of the realisations. In the opinion of the Company, excess of the NRV of these assets over the cost of the transaction, is profit/gain arising from the transaction, which is accrued during the year, and therefore, it is recognised as revenue from operations for the year.

31. As per the agreement between the Company and Suraksha Asset Reconstruction Pvt. Ltd. ('Suraksha'), return on certain credit Facility extended by the Company to Suraksha ('transaction') is linked to Suraksha's internal rate of return ('IRR') from realisation of Yamuna Expressway Tolling Ltd. account ('Yamuna Account'), i.e., the Financial Asset, acquired by Suraksha from Bank for asset reconstruction. Consequently, the Company's income from this transaction is ascertainable only upon the final outcome of the resolution of Yamuna Account and the resultant IRR yield of Suraksha from realisation of the Financial Asset. Accordingly, pending the resolution of Yamuna Account, the Company cannot recognise any income from the transaction during the FY 2019-20, there being significant uncertainty.

33 COVID Impact

All the possible impact of known events arising from COVID-19 pandemic in the preparation of the financial results have been considered. However, the impact of assessment of COVID-19 is a continuous process given the uncertainties associated with its nature and duration. The Board will continue to monitor any material changes to future economic conditions. It is very difficult to assess the future outlook at this stage as we are not yet past the COVID-19 crisis. However, given the trend of our operations, the Board is confident that it will tide this situation in the ensuing months and the going concern status will not be affected.

Notes to the consolidated financial statements as at 31st March 2020

(All amounts are INR, unless expressed otherwise)

Employee benefits plans

A. Gratuity

Every employee is entitled to a benefit equivalent to fifteen days salary last drawn for each completed year of service in line with the Payment of Gratuity Act, 1972. The same is payable at the time of separation from the Company or retirement whichever is earlier. The benefits vest after five years of continuous service.

The Company has a defined benefit plan for post-employment benefits in the form of Gratuity. Gratuity Benefits liabilities of the company are Unfunded. The Company accounts for gratuity based on an actuarial valuation which is carried out by an independent actuary as at the year end. The actuarial valuation method used by the independent actuary for measuring the liability is the Projected Unit Credit Method. Since the liabilities are unfunded, there is no Asset-Liability Matching strategy devised for plan.

Based on the actuarial valuation obtained in this respect, the following table sets out the status of the gratuity plan and the amount recognised in the Company's financial statement as at the balance sheet date :

Particulars	31 March 2020	31 March 2019	31 March 2018
A. Change in present value of obligations			
Liability at the beginning of the year	436,639	269,691	-
Adjusted through retained earnings	0		269,691
Transfer in/ (out) obligation	0		
Current service cost	256057	204,380	
Interest cost	29879	18,733	
Actuarial losses / (gain)	191339	(56,165)	
Past service cost			
Benefits paid			
Liability at the end of the year	913,914	436,639	269,691
D. Expense recognized in the statement of profit and loss			
Current service cost	256057	204,380	-
Interest cost	29879	18,733	-
Past Service Cost		-	-
Net gratuity expense	285,936	223,113	-
E. Remeasurements recognized in the OCI			
Actuarial (gain) / loss arising from	191339	(56,165)	
- experience adjustments	161750	(64,314)	
- actuarial assumptions	29589	8,149	

F. Actuarial Assumptions

Particulars	31 March 2020	31 March 2019	31 March 2018
Discount Rate	6.25%	6.95%	7.35%
Salary escalation rate	7.00%	7.00%	7.00%
Attrition Rate - Age (Years)			
25 & below	20.00%	20.00%	20.00%
25-35	20.00%	20.00%	20.00%
35-45	20.00%	20.00%	20.00%
45-55	20.00%	20.00%	20.00%
55 & above	20.00%	20.00%	20.00%
Mortality rate	Indian Assured Life Mortality (2012-14) Ultimate	Indian Assured Life Mortality (2006-08) Ultimate	Indian Assured Life Mortality (2006-08) Ultimate
Retirement Age	60 Years	60 Years	60 Years

Assumptions regarding future mortality experience are set in accordance with published statistics and mortality tables. The defined benefit plan expose the company to actuarial risks, such as longevity and Interest rate risk. The weighted average duration of the defined benefit obligation was 4.69 years (31 March 2018: 4.73)

The estimates of future salary increases, considered in actuarial valuation, take account of inflation, seniority, promotion and other relevant

The overall expected rate of return on assets is determined based on market prices prevailing on that date, applicable to the period over which the obligation is to be settled.

Sensitivity analysis

The sensitivity of the defined benefit obligation to changes in weighted principal assumption are as below :

Gratuity

Particulars	31 March 2020		31 March 2019	
	Increase	Decrease	Increase	Decrease
Discount rate (50 bps movement)	-2.39%	2.50%	-2.32%	2.43%
Salary escalation rate (50 bps movement)	1.04%	-1.02%	0.76%	-0.73%

Sensitivity of significant actuarial assumptions is computed by varying one actuarial assumption used for the valuation of defined benefit obligations by 50 basis points, keeping all the other actuarial assumptions constant. Although the analysis does not take into account of the full distribution of cash flows expected under the plan, if

3. Compensated absences

Particulars	31 March 2020	31 March 2019	31 March 2018

The Company's internal rating and PD estimation process

Probability of default (PD) is a key risk parameter in the ECL calculations. It is defined as the likelihood that a counterparty will not be able to meet its debt obligations in the future. A 12 months marginal PD is applied for all Stage 1 assets and a lifetime PD is applied for all Stage 2 and Stage 3 assets.

The company uses historical data to arrive at PDs which is based on rating Internal Rating Transition matrix and Roll Rate Estimation basis for its loans portfolios.

For arriving at PDs the company also takes into account relevant macro-economic factors both current and forecasted and use statistical model to arrive at the forecasted PDs.

The Company combines exposures that exhibit similar behaviour into pools based on identified risk drivers so that counterparties are behaviourally homogenous within pools and heterogeneous across pools. To do so, the Company relies on industry practices and expert judgement.

Exposure at Default

Exposure at default (EAD) is estimation of the extent that the Company is exposed to borrower in the event of default. EAD is arrived at take into account any expected changes in the exposure after the assessment date.

EAD in the case of facilities with no limits will be the outstanding exposure which will be calculated as principal + Due interest + Interest accrued but not due (as on reporting date). To calculate the EAD for a Stage 1 loan, the Company assesses the possible default events within 12 months for the calculation of the 12mECL. For Stage 2 and Stage 3 financial assets, the exposure at default is considered for events over the lifetime of the instruments.

The Company determines EADs by modelling the range of possible exposure outcomes at various points in time, corresponding the multiple scenarios. The Ind AS 109 PDs are then assigned to each economic scenario based on the outcome of Company's models.

Loss Given Default (LGD)

Loss given default (LGD) is defined as the forecasted economic loss in case of default. LGD computation is based on the Company's losses on defaulted accounts after consideration of recovery percentages. LGD computation is independent of the assessment of credit quality and thus applied uniformly across all stages.

The company computes LGD taking into account the value of collaterals and experience of past recovery from the defaulted cases. The recoveries are adjusted with time period delay and direct cost involved. Under Ind AS 109, LGD rates are estimated for the Stage 1, Stage 2 and Stage 3 segment of each asset class. These are repeated for each economic scenario as appropriate.

When assessing forward-looking information, the expectation is based on multiple scenarios. Examples of key inputs involve changes in, collateral values including property prices for mortgages, payment status or other factors that are indicative of losses.

Significant in Credit Risk (SICR)

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due. At each reporting date, the company assesses whether the credit risk on a financial instrument has increased significantly since its initial recognition. To make the assessment, Company considers available quantitative and qualitative information and also considers the company's historical experience and expert credit assessment.

Besides, the company also recognized SICR based on factors such as internal rating of borrowers, ssector or segment collectively assessed to have SICR, high risk events/attributes of client (bankruptcy etc.)

The below table shows the gross carrying amount of financial assets by credit ratings along with corresponding expected credit

Notes to the financial statements as at 31st March 2020

(All amounts are INR, unless expressed otherwise)

31 Financial Risk Management

The Company has exposure to the following risks from financial instruments:

- Credit risk
- Liquidity risk
- Market risk (currency risk)

This note presents information about the Company's objectives, policies and processes for measuring and managing risk.

Risk management framework:

The Board has the overall responsibility for the establishment and oversight of the Company's risk management framework. The board of directors has established the Risk Management Committee, which is responsible for developing and monitoring the Company's risk management policies. The committee reports regularly to the board of directors on its activities. The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies are reviewed regularly to reflect changes in market conditions and the Company's activities

A. Credit risk

Credit risk is the risk of financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the company's receivables from customers. The carrying amounts of financial assets represent the maximum credit risk exposure.

i) Credit risk management approach

The Company performs necessary due diligence on dealers viz. financial analysis, background checks, CIBIL, grading etc to arrive at sanctioning of limit. The Company follows the grading tool used by the group globally where certain qualitative and quantitative factors are considered to arrive at grading which helps in ascertaining the probability of default 'PD' of a particular client. This is used for decision making on limit sanction and precautions to be undertaken for a said client.

ii) Expected credit loss

Expected credit losses are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive).

The Company measures ECL based out of a probability based outcome using a multiple scenario approach such as Best Case, Base Case & Worst Case and assigning weightages to each of the scenario.

Definition of Default

The Company's definition of default is aligned with regulatory guidelines issued by RBI and internal credit risk management practices.

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the company in full, without recourse to actions such as realising security (if any is held); or
- the financial asset is 90 days or more past due
- identified by the management as such

Year ended 31 March 2020

Particulars	Asset group	Credit rating	Estimated gross carrying amount at default	Loss Rate	Expected credit losses	Carrying amount net of impairment provision

Write off

Financial assets are written off when there is no realistic prospect of recovery. This is generally the case when the company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with Company's procedures for recovery of amounts due.

Below is the details of the financial assets that were written off during the reporting period and are still subject to enforcement activity.

Year ended 31 March 2020

Contractual outstanding
Amount written off during the year

Notes to the consolidated financial statements as at 31st March 2020

(All amounts are INR, unless expressed otherwise)

32 First time adoption

Explanation of transition to Ind AS

As stated in Note 1, these are the Company's first financial statements prepared in accordance with Ind AS 1, Preparation and Presentation of financial statements. For the year ended 31 March 2020, the Company had prepared its financial statements in accordance with Companies (Accounting Standards) Rules, 2006, notified under Section 133 of the Act and other relevant provisions of the Act ('Indian GAAP').

The accounting policies set out in Note 1 have been applied in preparing these financial statements for the year ended 31 March 2020 including the comparative information for the year ended 31 March 2019 and the opening Ind AS balance sheet on the date of transition i.e., 1 April 2018.

In preparing its Ind AS balance sheet as at 1 April 2018 and in preparing the comparative information for the year ended 31 March 2019, the company has adjusted the amounts reported previously in financial statement prepared in accordance with Indian GAAP. This note explains the principal adjustments made by the Company in restating Indian GAAP financial statements and how the transition from Indian GAAP to Ind AS has affected the Balance Sheet, financial performance and cash flows.

Optional exemptions availed and mandatory exception

In preparing these financial statements, the Company has applied the below mentioned optional exemptions and mandatory exceptions.

A Optional exemptions availed

1. Property, plant and equipment & Intangible assets

As per Ind AS 101 an entity may elect to:

- (i) measure an item of property, plant and equipment at the date of transition at its fair value and use that fair value as its deemed cost at that date
- (ii) use a previous GAAP revaluation of an item of property, plant and equipment at or before the date of transition as deemed cost at the date of the revaluation, provided the revaluation was, at the date of the revaluation, broadly comparable to:
 - fair value;
 - or cost or depreciated cost under Ind AS adjusted to reflect, for example, changes in a general or specific price index.

The elections under (i) and (ii) above are also available for intangible assets that meets the recognition criteria in Ind AS 38, Intangible Assets, (including reliable measurement of original cost); and criteria in Ind AS 38 for revaluation (including the existence of an active market).

(iii) use carrying values of property, plant and equipment, intangible assets and investment properties as on the date of transition to Ind AS (which are measured in accordance with previous GAAP and after making adjustments relating to decommissioning liabilities prescribed under Ind AS 101) if there has been no change in its functional currency on the date of transition.

As permitted by Ind AS 101, the Company has elected to continue with the carrying values under Indian GAAP for all the items of property, plant and equipment. The same election has been made in respect of intangible assets as well.

B Mandatory Exceptions

1. Estimates

As per Ind AS 101, an entity's estimates in accordance with Ind AS at the date of transition to Ind AS at the end of the comparative period presented in the entity's first Ind AS financial statements, as the case may be, should be consistent with estimates made for the same date in accordance with the Indian GAAP unless there is objective evidence that those estimates were in error. However, the estimates should be adjusted to reflect any differences in accounting policies.

As per Ind AS 101, where application of Ind AS requires an entity to make certain estimates that were not required under Indian GAAP, those estimates should be made to reflect conditions that existed at the date of transition (for preparing opening Ind AS balance sheet) or at the end of the comparative period (for presenting comparative information as per Ind AS).

The Company's estimates under Ind AS are consistent with the above requirement. Key estimates considered in preparation of the financial statements that were not required under Indian GAAP are listed below:

- Impairment of financial assets based on the expected credit loss model.

2. Derecognition of financial assets and financial liabilities

As per Ind AS 101, an entity should apply the derecognition requirement in Ind AS 109, Financial Instrument, prospectively for transition occurring on or after the date of transition to Ind AS. However, an entity may apply the derecognition requirement retrospectively from a date chosen by it if the information needed to apply Ind AS 109 to financial assets and financial liabilities derecognised as a result of past transactions was obtained at the time of initially accounting for those transactions

Accordingly, the Company has opted to apply derecognition requirement prospectively for transaction occurring on or after the date of transition.

3. Classification and measurement of financial assets

Ind AS 101 requires an entity to assess classification of financial assets on the basis of facts and circumstances existing as on the date of transition. Further, the standard permits measurement of financial assets accounted at amortised cost based on facts and circumstances existing at the date of transition if retrospective application is impracticable.

Accordingly, the Company has determined the classification of financial assets based on facts and circumstances that exist on the date of transition.

Notes to the consolidated financial statements as at 31st March 2020

Deferred tax on Remeasurement gains (losses) on defined benefit plans		(14,603)
Other comprehensive income for the year under Ind AS		41,562
Total comprehensive income for the year under Ind AS		(74,865,325)

Fair value of Investments

Under Indian GAAP, This investment is carried at cost less any other-than-temporary diminution in value, determined separately for each individual investment. Under Ind AS Investments are carried at Fair value except investments in

Staff Loans and Advances

Under Indian GAAP, at the time of disbursement of loan entity recognizes loans and advance with the disbursed amount and further at the time of repayments reduce the same amount with outstanding loans and advances. Ind AS 109 requires all financial instruments to be recognized initially at their fair value, which is normally the transaction price. The fair value of such loans is then determined in accordance with Ind AS 113, Fair Value Measurement. The use of a present value technique is considered as an appropriate method for determining fair value of such loans. The difference between the fair value of the loan and the amount lent would be considered as an employee benefit provided by the Entity and should be generally recognized as an expense over the term of the loan. The loan asset is to be classified as measured at amortized cost and the company would be required to accrue interest income at the effective interest rate (i.e. the discount rate used to determine fair value) over the term of the loan.

Deferred Taxes

Indian GAAP requires deferred tax accounting using the statement of profit and loss approach, which focuses on differences between taxable profits and accounting profits for the period. Ind AS 12 requires entities to account for deferred taxes using the balance sheet approach, which focuses on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base. The application of Ind AS 12 approach has resulted in recognition of deferred tax on new temporary differences which was not required under Indian GAAP.

Actuarial gain/losses

Under previous GAAP, actuarial gains and losses were recognised in profit or loss. Under Ind AS, the actuarial gains and losses form part of remeasurement of the net defined benefit liability / asset which is recognised in other comprehensive income. Consequently, the tax effect of the same has also been recognised in other comprehensive income under Ind AS instead of profit or loss.

Statement of cash flows

The transition from Indian GAAP to Ind AS has not had a material impact on the statement of cash flows

FINQUEST FINANCIAL SOLUTIONS PRIVATE LIMITED

Notes forming part of the Consolidated Financial Statements

1. CORPORATE INFORMATION

Finquest Financial Solutions Pvt. Ltd. ('the Company') is registered as a Non-Banking Financial Company ('NBFC') as defined under section 45-IA of the Reserve Bank of India Act, 1934. The Company is principally engaged in lending and investing activities.

2. SIGNIFICANT ACCOUNTING POLICIES

i. Statement of compliance

In accordance with the notification issued by the Ministry of Corporate Affairs, the Company has adopted Indian Accounting Standards (referred to as "Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015. The Company has adopted Ind AS from April 1, 2019 with effective transition date as April 1, 2018. These financial statements have been prepared in accordance with Ind AS as notified under the Companies (Indian Accounting Standards) Rules, 2015 read with Section 133 of the Companies Act, 2013 (the "Act"). The transition was carried out from Accounting Principles generally accepted in India as prescribed under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (IGAAP), which was the previous GAAP. An explanation of how the transition to Ind AS has affected the previously reported financial position, financial performance and cash flows of the Company is provided in Note no 32.

ii. Presentation of financial statements

The Company presents its balance sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in notes to the financial statements.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Company and/or its counterparties

iii. Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services at the time of entering into the transaction.

BJP
X

SAD
X
Pater

Measurement of fair values:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique.

Fair value for measurement and/or disclosure purposes for certain items in these financial statements is determined considering following methods:

Items	Measurement basis
Certain financial assets and liabilities (including derivatives instruments)	Fair value
Net defined benefit (asset)/liability	Fair value of planned assets less present value of defined benefit obligations
Property plant and equipment	Value in use under Ind AS 36

iv. Principles of Consolidation

The consolidated financial statements relate to Finquest financial solutions Pvt Ltd (the "Company") and the Company's share of profit / loss in its subsidiary. The consolidated financial statements have been prepared on the following basis:

- a) The financial statements of subsidiary used in the consolidation are drawn upto the same reporting date as that of the Company i.e., March 31, 2020 or upto the date on which it ceased to be an subsidiary of the Company whichever is earlier.
- b) The consolidated financial statements include the share of profit/ (loss) of subsidiary company, which have been accounted for as per Ind AS 110 (Consolidated Financial Statements).

The consolidated financial statements comprise the financial statements of the company, its subsidiaries (being the entity that it controls) and its Associate as at 31st March 2020. Control is evidenced when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights
- The size of the Group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are

BTP
SAP
Shah

made to that Group member's financial statements in preparing the consolidated financial statements to ensure conformity with the Group's accounting policies.

The financial statements of all entities used for the purpose of consolidation are drawn up to same reporting date as that of the parent company, i.e., year ended on 31st March.

Consolidation procedure:

a) Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the consolidated financial statements at the acquisition date.

(b) Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary. Business combinations policy explains how to account for any related goodwill.

(c) Eliminate in full intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the Group (profits or losses resulting from intra-group transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intra-group losses may indicate an impairment that requires recognition in the

consolidated financial statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions Profit or loss and each component of OCI are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies. All

intra-group assets, liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary
- Derecognises the carrying amount of any noncontrolling interests
- Derecognises the cumulative translation differences recorded in equity
- Recognises the fair value of the consideration received
- Recognises the fair value of any investment retained
- Recognises any surplus or deficit in profit or loss
- Reclassifies the parent's share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities

A change in the ownership interest of a subsidiary, without loss of control, is accounted for as an equity transaction.

Particulars of consolidation

The financial statements of the following subsidiaries/ associates (all incorporated in India) have been considered for consolidation:

Name of the company	% of voting power as at 31-Mar-19	% of voting power as at 31-Mar-20
Krihaan Texchem Pvt Ltd	99	100

Investment in an Associate

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee.

The Group's investments in its associate are accounted for using the equity method. Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is not tested for impairment individually.

The statement of profit and loss reflects the Group's share of the results of operations of the associate. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

If an entity's share of losses of an associate equals or exceeds its interest in the associate (which includes any long term interest that, in substance, form part of the Group's net investment in the associate), the entity discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate. If the associate subsequently reports profits, the entity resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

The aggregate of the Group's share of profit or loss of an associate is shown on the face of the statement of profit and loss.

The financial statements of the associate are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value, and then recognises the impairment loss with respect to the Group's investment in an associate.

Upon loss of significant influence over the associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

Fair value measurements under Ind AS are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- a) Level 1: inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at measurement date
- b) Level 2: inputs are inputs, other than quoted prices included within level 1, that are observable for the asset or liability, either directly or indirectly; and
- c) Level 3: inputs are unobservable inputs for the valuation of assets or liabilities that the Company can access at measurement date.

v. Use of estimates and judgements

The preparation of financial statements requires the management of the group to make judgements, assumptions and estimates that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expenses for the reporting period. The application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in the financial statements have been disclosed as applicable in the respective notes to accounts. Accounting estimates could change from period to period. Future results could differ from these estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

Judgements:

Information about judgements made in applying accounting policies that have a most significant effect on the amount recognised in the consolidated financial statements is included following notes:

- Note ix - classification of financial assets: assessment of the business model within which the assets are held and assessment of whether the contractual terms of the financial asset are solely payments of principal and interest on the principal amount outstanding.

Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the year ending March 31, 2020 is included in the following notes:

'Note 9 – recognition of deferred tax assets: availability of future taxable profit against which carry forward deferred tax asset can be set off.'

Note 10 - useful life of property, plant, equipment and intangibles.

Notes 16 – recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources.

Note – 25 impairment of financial instruments: key assumptions used in estimating recoverable cash flows.

Note 30 – determination of the fair value of financial instruments with significant unobservable inputs.

Note EMB – measurement of defined benefit obligations: key actuarial assumptions.

vi. Interest

Interest income and expense are recognised using the effective interest method. The effective interest rate (EIR) is the rate that exactly discounts estimated future cash flows through the expected life of the financial instrument to the gross carrying amount of the financial asset or amortised cost of the financial liability.

The calculation of the EIR includes all fees paid or received that are incremental and directly attributable to the acquisition or issue of a financial asset or liability.

The interest income is calculated by applying the EIR to the gross carrying amount of non-credit impaired financial assets (i.e. at the amortised cost of the financial asset before adjusting for any expected credit loss allowance). For credit-impaired financial assets the interest income is calculated by applying the EIR to the amortised cost of the credit-impaired financial assets (i.e. at the amortised cost of the financial asset after adjusting for any expected credit loss allowance (ECLs)). The Company assesses the collectability of the interest on credit impaired assets at each reporting date. Based on the outcome of such assessment, the Interest income accrued on credit impaired financial assets are

BM

SAP
x
Slater

either accounted for as income or written off as per the write off policy of the Company. The interest cost is calculated by applying the EIR to the amortised cost of the financial liability. Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin.

The 'amortised cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance.

The 'gross carrying amount of a financial asset' is the amortised cost of a financial asset before adjusting for any expected credit loss allowance.

vii. Income from services and distribution of financial products

Revenue from brokerage is recognised when the service is performed. Revenue is net of applicable indirect taxes and sub-brokerage.

viii. Dividend income

Income from dividend on investment in equity shares of corporate bodies and units of mutual funds is accounted when the group's right to receive dividend is established.

ix. Financial Instruments

Financial assets and financial liabilities are recognised in the group's balance sheet on settlement date when the group becomes a party to the contractual provisions of the instrument.

Recognised financial assets and financial liabilities are initially measured at fair value.

Transaction costs and revenues that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs and revenues directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in the Statement of Profit or Loss.

If the transaction price differs from fair value at initial recognition, the group will account for such difference as follows:

- a) if fair value is evidenced by a quoted price in an active market for an identical asset or liability or based on a valuation technique that uses only data from observable markets, then the difference is recognised in profit or loss on initial recognition (i.e. day 1 profit or loss);
- b) in all other cases, the fair value will be adjusted to bring it in line with the transaction price (i.e. day 1 profit or loss will be deferred by including it in the initial carrying amount of the asset or liability).

After initial recognition, the deferred gain or loss will be released to profit or loss on a rational basis, only to the extent that it arises from a change in a factor (including time) that market participants would take into account when pricing the asset or liability.

a) Financial assets Classification

On initial recognition, depending on the group's business model for managing the financial assets and its contractual cash flow characteristics, a financial asset is classified as measured at;

Bm

BTP
SAP
Slater

- 1) amortised cost;
- 2) fair value through other comprehensive income (FVTOCI); or
- 3) fair value through profit and loss (FVTPL).

Initial recognition and measurement

Financial asset is recognised on settlement date initially at cost of acquisition net of transaction cost and income that is attributable to the acquisition of the financial asset. Cost equates the fair value on acquisition. Financial asset measured at amortised cost and Financial measured at fair value through other comprehensive income is presented at gross carrying value in the Financial statements. Unamortised transaction cost and incomes and impairment allowance on Financial asset is shown separately under the heading "Other non-financial asset", "Other non-financial liability" and "Provisions" respectively.

Assessment of Business model

An assessment of the applicable business model for managing financial assets is fundamental to the classification of a financial asset. The group determines the business models at a level that reflects how financial assets are managed together to achieve a particular business objective. The group's business model does not depend on management's intentions for an individual instrument, therefore the business model assessment is performed at a higher level of aggregation rather than on an instrument-by-instrument basis.

The group could have more than one business model for managing its financial instruments which reflect how the group manages its financial assets in order to generate cash flows. The group's business models determine whether cash flows will result from collecting contractual cash flows, selling financial assets or both.

The group considers all relevant information available when making the business model assessment. The group takes into account all relevant evidence available such as:

- 1) how the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel and board of directors;
- 2) the risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way in which those risks are managed; and
- 3) how managers of the business are compensated (e.g. whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).
- 4) At initial recognition of a financial asset, the group determines whether newly recognised financial assets are part of an existing business model or whether they reflect the commencement of a new business model. The group reassesses its business models each reporting period to determine whether the business model/(s) have changed since the preceding period. For the current and prior reporting period the group has not identified a change in its business model.

Based on the assessment of the business models, the group has identified the three following choices of classification of financial assets:

- a) Financial assets that are held within a business model whose objective is to collect the contractual cash flows ("Asset held to collect contractual cash-flows"), and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI), are measured at amortised cost;
- b) Financial assets that are held within a business model whose objective is both to collect the contractual cash flows and to sell the assets, ("Contractual cash flows of Asset collected through hold and sell model") and that have contractual cash flows that are SPPI, are measured at FVTOCI.
- c) All other financial assets (e.g. managed on a fair value basis, or held for sale) and equity investments are measured at FVTPL.

Bm

Slater

Financial asset at amortised cost

Amortised cost of financial asset is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. For the purpose of SPPI test, principal is the fair value of the financial asset at initial recognition. That principal amount may change over the life of the financial asset (e.g. if there are repayments of principal).

Contractual cash flows that do not introduce exposure to risks or volatility in the contractual cash flows on account of changes such as equity prices or commodity prices and are related to a basic lending arrangement, do give rise to SPPI. An originated or an acquired financial asset can be a basic lending arrangement irrespective of whether it is a loan in its legal form.

The EIR amortisation is included in finance income in the profit and loss statement. The losses arising from impairment are recognised in the profit and loss statement.

Financial asset at fair value through Other Comprehensive Income (FVTOCI)

After initial measurement, basis assessment of the business model as "Contractual cash flows of Asset collected through hold and sell model and SPPI", such financial assets are classified to be measured at FVOCI. Contractual cash flows that do introduce exposure to risks or volatility in the contractual cash flows due to changes such as equity prices or commodity prices and are unrelated to a basic lending arrangement, do not give rise to SPPI.

The EIR amortisation is included in finance income in the profit and loss statement. The losses arising from impairment are recognised in the profit and loss statement. The carrying value of the financial asset is fair valued by discounting the contractual cash flows over contractual tenure basis the internal rate of return of a new similar asset originated in the month of reporting and such unrealised gain/loss is recorded in other comprehensive income (OCI). Where such a similar product is not originated in the month of reporting, the closest product origination is used as a proxy. Upon sale of the financial asset, actual the gain/loss realised is recorded in the profit and loss statement and the unrealised/gain losses recorded in OCI are recycled to the statement of profit and loss.

Financial asset at fair value through profit and loss (FVTPL)

Financial asset, which does not meet the criteria for categorization at amortized cost or FVOCI, is classified as at FVTPL. In addition, the group may elect to classify a financial asset, which otherwise meets amortized cost or FVOCI criteria, as FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). Financial assets included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss.

Investment in equity, security receipt, mutual fund, non-cumulative redeemable preference shares and cumulative compulsorily convertible preference shares

Investment in equity, security receipt, mutual fund, non-cumulative redeemable preference shares and cumulative compulsorily convertible preference shares are classified as FVTPL and measured at fair value with all changes recognised in the statement of profit and loss. Upon initial recognition, the group, on an instrument-by-instrument basis, may elect to classify equity instruments other than held for trading either as FVTOCI or FVTPL. Such election is subsequently irrevocable. If FVTOCI is elected, all fair value changes on the instrument, excluding dividends, are recognized in OCI. There is no recycling of the gains or losses from OCI to the statement of profit and loss, even upon sale of investment. However, the group may transfer the cumulative gain or loss within other equity upon realisation.

Investment in associates:

The group has elected to measure Investment in associates at cost.

Reclassifications within classes of financial assets

A change in the business model would lead to a prospective re-classification of the financial asset and accordingly the measurement principles applicable to the new classification will be applied. During the current financial year and

previous accounting period there was no change in the business model under which the group holds financial assets and therefore no reclassifications were made.

Impairment of Financial Assets

The group is required to recognise expected credit losses (ECLs) based on forward-looking information for all financial assets at amortised cost, lease receivables, debt financial assets at fair value through other comprehensive income, loan commitments and financial guarantee contracts. No impairment loss is applicable on equity investments.

At the reporting date, an allowance (or provision for loan commitments and financial guarantees) is required for the 12 month ECLs. If the credit risk has significantly increased since initial recognition (Stage 1), an allowance (or provision) should be recognised for the lifetime ECLs for financial instruments for which the credit risk has increased significantly since initial recognition (Stage 2) or which are credit impaired (Stage 3).

The measurement of ECL is calculated using three main components: (i) probability of default (PD) (ii) loss given default (LGD) and (iii) the exposure at default (EAD). The 12 month ECL is calculated by multiplying the 12 month PD, LGD and the EAD. The 12 month and lifetime PDs represent the PD occurring over the next 12 months and the remaining maturity of the instrument respectively. The EAD represents the expected balance at default, taking into account the repayment of principal and interest from the balance sheet date to the default event together with any expected drawdowns of committed facilities. The LGD represents expected losses on the EAD given the event of default, taking into account, among other attributes, the mitigating effect of collateral value at the time it is expected to be realised and the time value of money.

The group applies a three-stage approach to measure ECL on financial assets accounted for at amortised cost and FVOCI. Assets migrate through the following three stages based on the change in credit quality since initial recognition.

1. Stage 1: 12-months ECL

For exposures where there has not been a significant increase in credit risk since initial recognition and that are not credit impaired upon origination, the portion of the lifetime ECL associated with the probability of default events occurring within the next 12 months is recognised. Exposures with days past due (DPD) less than or equal to 29 days are classified as stage 1. The group has identified zero bucket and bucket with DPD less than or equal to 29 days as two separate buckets.

2. Stage 2: Lifetime ECL – not credit impaired

For credit exposures where there has been a significant increase in credit risk since initial recognition but that are not credit impaired, a lifetime ECL is recognised. Exposures with DPD equal to 30 days but less than or equal to 89 days are classified as stage 2. At each reporting date, the group assesses whether there has been a significant increase in credit risk for financial asset since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The group has identified cases with DPD equal to or more than 30 days and less than or equal to 59 days and cases with DPD equal to or more than 60 days and less than or equal to 89 days as two separate buckets.

3. Stage 3: Lifetime ECL – credit impaired

Financial asset is assessed as credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred. For financial asset that have become credit impaired, a lifetime ECL is recognised on principal outstanding as at period end. Exposures with DPD equal to or more than 90 days are classified as stage 3.

A loan that has been renegotiated due to a deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. ECL is recognised on EAD as at period end. If the terms of a financial asset are renegotiated or modified due to financial difficulties of the borrower, then such asset is moved to stage 3, lifetime ECL under stage 3 on the outstanding amount is applied.

BJP
SAP
Spatel

The group assesses when a significant increase in credit risk has occurred based on quantitative and qualitative assessments. Exposures are considered to have resulted in a significant increase in credit risk and are moved to Stage 2 when:

1. Quantitative test: Accounts that are 30 calendar days or more past due move to Stage 2 automatically. Accounts that are 90 calendar days or more past due move to Stage 3 automatically.
2. Qualitative test: Accounts that meet the portfolio's 'high risk' criteria and are subject to closer credit monitoring. High risk customers may not be in arrears but either through an event or an observed behaviour exhibit credit distress.
3. Reversal in Stages: Exposures will move back to Stage 2 or Stage 1 respectively, once they no longer meet the quantitative criteria set out above.

For exposures classified using the qualitative test, when they no longer meet the criteria for a significant increase in credit risk and when any cure criteria used for credit risk management are met.

The definition of default for the purpose of determining ECLs has been aligned to the Reserve Bank of India definition of default, which considers indicators that the debtor is unlikely to pay and is no later than when the exposure is more than 90 days past due. The group continues to incrementally provide for the asset post initial recognition in Stage 3, based on its estimate of the recovery.

In line with the above policy, the group has thus fully provided for/ written off the entire receivables in the current financial year as per table below:

Product	Overdue criteria
Loan against property	15 months and above
Construction equipment, auto, commercial	10 months and above

vehicles, two wheeler and personal loan	
Consumer durables	5 months and above

The measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions and reasonable and supportable forecasts. The measurement of ECL involves increased complexity and judgement, including estimation of PDs, LGD, a range of unbiased future economic scenarios, estimation of expected lives, and estimation of EAD and assessing significant increases in credit risk.

Impairment of Trade receivable and Operating lease receivable

Impairment allowance on trade receivables is made on the basis of life time credit loss method, in addition to specific provision considering the uncertainty of recoverability of certain receivables.

Modification and De-recognition of financial assets

Modification of a financial asset occurs when the contractual terms governing the cash flows of a financial asset are renegotiated or otherwise modified between initial recognition and maturity of the financial asset. A modification affects the amount and/or timing of the contractual cash flows either immediately or at a future date. The Company renegotiates loans to customers in financial difficulty to maximise collection and minimise the risk of default. A loan forbearance is granted in cases where although the borrower made all reasonable efforts to pay under the original contractual terms, there is a high risk of default or default has already happened and the borrower is expected to be able to meet the revised terms. The revised terms in most of the cases include an extension of the maturity of the loan, changes to the timing of the cash flows of the loan (principal and interest repayment),

Bm

BTP
x

SAP
Spatel

reduction in the amount of cash flows due (principal and interest forgiveness). Such accounts are classified as stage 3 immediately upon such modification in the terms of the contract. Not all changes in terms of loans are considered as renegotiation and changes in terms of a class of obligors that are not overdue is not considered as renegotiation and is not subjected to deterioration in staging.

De-recognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- 1) the rights to receive cash flows from the asset have expired, or
- 2) the Company has transferred its rights to receive cash flows from the asset and substantially all the risks and rewards of the asset, or the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Write-off

Impaired loans and receivables are written off, against the related allowance for loan impairment on completion of the Company's internal processes and when the Company concludes that there is no longer any realistic prospect of recovery of part or all of the loan. For loans that are individually assessed for impairment, the timing of write off is determined on a case by case basis. A write-off constitutes a de-recognition event. The Company has right to apply enforcement activities to recover such written off financial assets. Subsequent recoveries of amounts previously written off are credited to the income statement.

Presentation of ECL allowance for financial asset:

Type of Financial asset	Disclosure
Financial asset measured at amortised cost	shown separately under the head "provisions" and not as a deduction from the gross carrying amount of the assets
Financial assets measured at FVTOCI	
Loan commitments and financial guarantee contracts	shown separately under the head "provisions"

Where a financial instrument includes both a drawn and an undrawn component and the Company cannot identify the ECL on the loan commitment separately from those on the drawn component, the Company presents a combined loss allowance for both components under "provisions".

Financial liability, Equity and Compound Financial Instruments Financial liabilities and equity

Debt and equity instruments that are issued are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

Financial liabilities

A financial liability is a contractual obligation to deliver cash or another financial asset or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the group or a contract that will or may be settled in the group's own equity instruments and is a non-derivative contract for which the group is or may be obliged to deliver a variable number of its own equity instruments, or a derivative contract over own equity that will or may be settled other than by the exchange of a fixed amount of cash (or another financial asset) for a fixed number of the group's own equity instruments.

Bm?

BTP
x

SAP
x
Shah

Classification

The group classifies its financial liability as "Financial liability at amortised cost" except for financial liability at fair value through profit and loss (FVTPL).

Initial recognition and measurement

Financial liability is recognised initially at cost of acquisition net of transaction costs and incomes that is attributable to the acquisition of the financial liability. Cost equates the fair value on acquisition. group may irrevocably designate a financial liability that meet the amortised cost as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch (referred to as the fair value option).

De-recognition of financial liabilities

The group derecognises financial liabilities when, and only when, the group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

Equity

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the group are recognised at the proceeds received, net of direct issue costs. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the group's own equity instruments is an equity instrument.

No gain/loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the group's own equity instruments.

Compound instruments

The component parts of compound instruments (e.g. cumulative compulsorily convertible preference shares CCCPS) issued by the group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. A conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently re-measured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to share capital and share premium. Where the conversion option remains unexercised at the maturity date of the convertible note, the balance recognised in equity will be transferred to retained profits. No gain/loss is recognised in profit or loss upon conversion or expiration of the conversion option.

A Cumulative Compulsorily Convertible Preference Shares (CCCPS), with an option to holder to convert the instrument in to variable number of equity shares of the entity upon redemption is classified as a financial liability and dividend including dividend distribution tax is accrued on such instruments and recorded as finance cost.

Cash, Cash equivalents and bank balances

Cash, Cash equivalents and bank balances include fixed deposits, margin money deposits, and earmarked balances with banks are carried at amortised cost. Short term and liquid investments being subject to more than insignificant risk of change in value, are not included as part of cash and cash equivalents.

BJP

BJP
*

SAP
*
S/Pate

x. Property, plant and equipment

a. Tangible

Tangible property, plant and equipment (PPE) acquired by the Company are reported at acquisition cost less accumulated depreciation and accumulated impairment losses, if any. The acquisition cost includes any cost attributable for bringing asset to its working condition net of tax/duty credits availed, which comprises of purchase consideration, other directly attributable costs of bringing the assets to their working condition for their intended use. PPE is recognised when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

b. Capital work-in-progress

PPE not ready for the intended use on the date of the Balance Sheet are disclosed as "capital work-in-progress" and carried at cost, comprising direct cost, related incidental expenses and attributable interest.

c. Intangible

Intangible assets are recognised when it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are stated at original cost net of tax/duty credits availed, if any, less accumulated amortisation and cumulative impairment. Administrative and other general overhead expenses that are specifically attributable to acquisition of intangible assets are allocated and capitalised as a part of the cost of the intangible assets. Expenses on software support and maintenance are charged to the Statement of Profit and Loss during the year in which such costs are incurred.

d. Depreciation and Amortisation

Depreciable amount for tangible property, plant and equipment is the cost of an asset, or other amount substituted for cost, less its estimated residual value. The residual value of each asset given on Operating lease is determined at the time of recording of the lease asset. If the residual value of the Operating lease asset is higher than 5%, the group has a justification in place for considering the same.

Depreciation on tangible property, plant and equipment deployed for own use has been provided on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013 except in respect of Buildings, Computer Equipment networking assets, electrical installation and equipment and Vehicles, in whose case the life of the assets has been assessed based on the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, etc. Depreciation on tangible property, plant and equipment deployed on operating lease has been provided on the straight-line method over the primary lease period of the asset. Depreciation method is reviewed at each financial year end to reflect expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life and residual values are also reviewed at each financial year end with the effect of any change in the estimates of useful life/residual value is accounted on prospective basis. Depreciation for additions to/deductions from, owned assets is calculated pro rata to the remaining period of use. Depreciation charge for impaired assets is adjusted in future periods in such a manner that the revised carrying amount of the asset is allocated over its remaining useful life. All capital assets with individual value less than Rs. 5,000 are depreciated fully in the year in which they are purchased.

Purchased software / licenses are amortised over the estimated useful life during which the benefits are expected to accrue, while Goodwill if any is tested for impairment at each Balance Sheet date. The method of amortisation and useful life are reviewed at the end of each accounting year with the effect of any changes in the estimate being accounted for on a prospective basis. Amortisation on impaired assets is provided by adjusting the amortisation charge in the remaining periods so as to allocate the asset's revised carrying amount over its remaining useful life. Estimated useful life considered by the group are:

BJP
x

SAP
x
Shaker

Asset	Estimated Useful Life
Furniture and Fixtures	Owned: 10 years
Computer Equipment	Owned: 3 to 4 years

Plant & Machinery	Owned: 10 years

e. Reclassification to Investment property

Properties held to earn rentals and/or capital appreciation are classified as Investment properties and measured and reported at cost, including transaction costs. When the use of an existing property changes from owner-occupied to investment property, the property is reclassified as investment property at its carrying amount on the date of reclassification.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on de-recognition of property is recognised in the Statement of Profit and Loss in the same period.

f. Impairment of assets

Upon an observed trigger or at the end of each accounting year, the group reviews the carrying amounts of its PPE, investment property and intangible asset to determine whether there is any indication that the asset have suffered an impairment loss. If such indication exists, the PPE, investment property and intangible assets are tested for impairment so as to determine the impairment loss, if any.

Impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount. Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If recoverable amount of an asset is estimated to be less than its carrying amount, such deficit is recognised immediately in the Statement of Profit and Loss as impairment loss and the carrying amount of the asset is reduced to its recoverable amount.

When an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit and Loss.

g. De-recognition of property, plant and equipment and intangible asset

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss. An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

BTP
BTP

SAP
* State

xi. Non-Current Assets held for sale:

Non-current assets are classified as held for sale if their carrying amount is intended to be recovered principally through a sale (rather than through continuing use) when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such asset and the sale is highly probable and is expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets classified as held for sale are measured at lower of their carrying amount and fair value less costs to sell.

The group has a policy to make impairment provision at one third of the value of the Asset for each year upon completion of three years upto the end of five years.

xii. Employee Benefits

Defined employee benefits include provident fund, superannuation fund, employee state insurance scheme.

Defined contribution benefits includes gratuity fund, compensated absences, long service awards and post-employment medical benefits.

Defined contribution plans

The eligible employees of the group are entitled to receive benefits under the provident fund, a defined contribution plan, in which both employees and the group make monthly contributions at a specified percentage of the covered employees' salary (currently 12% of employees' salary), which is recognised as an expense in the Statement of Profit and Loss in the year in which they occur. The contributions as specified under the law are paid to the provident fund set up as irrevocable trust by the group. The group is generally liable for annual contributions and any deficiency in interest cost compared to interest computed based on the rate of interest declared by the Central Government under the employee provident scheme, 1952 is recognised as an expense in the year in which it is determined.

The group's contribution to superannuation fund and employee state insurance scheme are considered as defined contribution plans and are charged as an expense in the Statement of Profit and Loss based on the amount of contribution required to be made and when services are rendered by the employees.

Defined benefit plans

For defined benefit plans in the form of gratuity, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each Balance Sheet date. Re-measurement of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised immediately in OCI. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is

amortised on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the schemes.

Short-term employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the year in which the employee renders the related service.

BTP
SAD
Slater

The cost of short-term compensated absences is accounted as under:

- (a) in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and
- (b) in case of non-accumulating compensated absences, when the absences occur.

Long-term employee benefits

Compensated absences which are not expected to occur within twelve months after the end of the year in which the employee renders the related service are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date less the fair value of the plan assets out of which the obligations are expected to be settled. Long term service awards are recognised as a liability at the present value of the defined benefit obligation as at the balance sheet date.

Share based payment transaction

The stock options of the Parent group is granted to employees pursuant to the group's Stock Options Schemes, are measured at the fair value of the options at the grant date. The amount recognised as expense is based on the estimate of the number of options for which he related service and non-market and non-market vesting conditions are expected to be met, such that the amount ultimately recognised as an expense is based on the number of options that do meet the related service and non-market vesting conditions at the vesting date. For share-based options with non-vesting conditions, the grant date fair value of the share-based payment is measured to reflect such conditions and there is no true-up for differences between expected and actual outcomes. The fair value of the options is treated as discount and accounted as employee compensation cost over the vesting period on a straight line basis. The amount recognised as expense in each year is arrived at based on the number of grants expected to vest. If a grant lapses after the vesting period, the cumulative discount recognised as an expense in respect of such grant is transferred to the general reserve within other equity, which a free reserve in nature.

xiii. Securities premium account

The group records premium on account of

1. On issuance of new equity shares;
2. On conversion of CCCPS into equity shares

The issue expenses of securities which qualify as equity instruments are written off against securities premium account.

xiv. Foreign currencies transactions

Transactions in currencies other than the group's functional currency are recorded on initial recognition using the exchange rate at the transaction date. At each Balance Sheet date, foreign currency monetary items are reported at the rates prevailing at the year end. Non-monetary items that are measured in terms of historical cost in foreign currency are not retranslated.

Exchange differences that arise on settlement of monetary items or on reporting of monetary

items at each Balance Sheet date at the closing spot rate are recognised in the Statement of Profit and Loss in the period in which they arise.

BT P
SAP
13/01
SAP
Slater

xv. Operating Segments

The group's main business is financing by way of loans for retail and corporate borrowers in India. The group's operating segments consist of "Financing Activity", "Investment Activity" and "Others". All other activities of the group revolve around the main businesses. This in the context of Ind AS 108 – operating segments reporting are considered to constitute reportable segment. The Chief Operating Decision Maker (CODM) of the group is the Board of Directors. Operating segment disclosures are consistent with the information reviewed by the CODM.

An operating segment is a component of the group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the group's other components, and for which discrete financial information is available. Accordingly all operating segment's operating results of the group are reviewed regularly by the Board of Directors to make decisions about resources to be allocated to the segments and assess their performance.

The "Financing Activity" segment consists of asset financing, term loans (corporate and retail), channel financing, credit substitutes, investments linked to/arising out of lending business and bill discounting. The "Investment Activity" segment includes corporate investments and "Others" segment primarily includes advisory services, wealth management, distribution of financial products and leasing.

Revenue and expense directly attributable to segments are reported under each operating segment. Expenses not directly identifiable to each of the segments have been allocated to each segment on the basis of associated revenues of each segment. All other expenses which are not attributable or allocable to segments have been disclosed as un-allocable expenses. Assets and liabilities that are directly attributable to segments are disclosed under each reportable segment. All other assets and liabilities are disclosed as un-allocable.

xvi. Investments in Associates

The group has elected to measure investment in associate at cost plus profit pick up.

xvii. Earnings per share

Basic earnings per share has been computed by dividing net income by the weighted average number of shares outstanding during the year. Partly paid up shares are included as fully paid equivalents according to the fraction paid up.

xviii. Taxation

Income Tax

Income tax expense comprises current and deferred taxes. Income tax expense is recognized in the Statement of Profit and Loss except when they relate to items that are recognized outside profit or loss (whether in other comprehensive income or directly in equity), in which case tax is also recognized outside profit or loss.

Current Tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax law) enacted or substantively enacted by the reporting date.

Current tax asset and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

BJP
SAP
BSP
States

Deferred Tax

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilized business loss and depreciation carry-forwards and tax credits. Such deferred tax assets and liabilities are computed separately for each taxable entity. Deferred tax assets are recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilized.

Deferred tax assets and liabilities are measured based on the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the group intends to settle its current tax assets and liabilities on a net basis.

Goods and Services Input Tax Credit

Goods and Services tax input credit is accounted for in the books in the period in which the supply of goods or service received is accounted and when there is no uncertainty in availing/utilising the credits.

xix. Provisions, contingent liabilities and contingent assets

Provisions are recognised only when:

- (i) an entity has a present obligation (legal or constructive) as a result of a past event; and
- (ii) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- (iii) a reliable estimate can be made of the amount of the obligation

Provision is measured using the cash flows estimated to settle the present obligation and when the effect of time value of money is material, the carrying amount of the provision is the present value of those cash flows. Reimbursement expected in respect of expenditure required to settle a provision is recognised only when it is virtually certain that the reimbursement will be received.

Contingent liability is disclosed in case of:

- (i) a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and
- (ii) a present obligation arising from past events, when no reliable estimate is possible. Contingent assets are disclosed where an inflow of economic benefits is probable. Provisions, contingent liabilities and contingent assets are reviewed at each Balance Sheet date.

Where the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under such contract, the present obligation under the contract is recognised and measured as a provision.

Contingent assets are not recognised in the financial statements.

Slater

13/01

xx. Commitments

Commitments are future liabilities for contractual expenditure, classified and disclosed as follows:

- a) estimated amount of contracts remaining to be executed on capital account and not provided for;
- b) uncalled liability on shares and other investments partly paid;
- c) funding related commitment to associate; and
- d) other non-cancellable commitments, if any, to the extent they are considered material and relevant in the opinion of management.
- e) Other commitments related to sales/procurements made in the normal course of business are not disclosed to avoid excessive details.
- f) Commitments under Loan agreement to disburse Loans
- g) Lease agreements entered but not executed

xxi. Statement of Cash Flows

Statement of Cash Flows is prepared segregating the cash flows into operating, investing and financing activities. Cash flow from operating activities is reported using indirect method adjusting the net profit for the effects of:

- i. changes during the period in operating receivables and payables transactions of a non-cash nature;
- ii. non-cash items such as depreciation, provisions, deferred taxes, unrealised foreign currency gains and losses, and undistributed profits of associates and joint ventures; and
- iii. all other items for which the cash effects are investing or financing cash flows.

Cash and cash equivalents (including bank balances) shown in the Statement of Cash Flows exclude items which are not available for general use as on the date of Balance Sheet.

xxii. Dividend payable (including dividend distribution tax)

Interim dividend declared to equity shareholders, if any, is recognised as liability in the period in which the said dividend has been declared by the Directors. Final dividend declared, if any, is recognised in the period in which the said dividend has been approved by the Shareholders.

xxiii. First time adoption of Ind AS (read with note 2(i))

The group has adopted Indian Accounting Standards (Ind AS) as notified by the Ministry of Corporate Affairs with effect from 1st April, 2019, with a transition date of 1st April, 2018. The financial statements for the half year ended September 30, 2019 are the first financial statements, the group has prepared under Ind AS. For all periods up to and including the year ended 31st March, 2019, the group prepared its financial statements in accordance with the accounting standards notified under the section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 ('Previous GAAP').

The adoption of Ind AS has been carried out in accordance with Ind AS 101, First-time Adoption of Indian Accounting Standards. Ind AS 101 requires that all Ind AS standards and interpretations that are issued and effective for the first Ind AS financial statements be applied retrospectively and consistently for all financial years presented. Accordingly, the group has prepared financial statements which comply with Ind AS for the half year ended September 30, 2019 and the opening Ind AS Balance Sheet as at April 1, 2018, the date of transition to Ind AS and also as at March 31, 2020.

BTP
BM

SAP
Sater

In preparing these Ind AS financial statements, the group has availed certain exemptions and exceptions in accordance with Ind AS 101, as in Note 32. The resulting difference between the carrying values of the assets and liabilities in the financial statements as at the transition date under Ind AS and Previous GAAP have been recognised directly in equity (retained earnings or another appropriate category of equity). Note 3 explains the adjustments made by the group in restating its financial statements prepared under previous GAAP, including the statement of profit and loss account for the year ended March 31, 2020 and the Balance Sheet as at April 1, 2018 and as at March, 31 2019.

YOUR FINANCIAL GOAL. OUR QUEST

To,
M/s R.C. Jain and Associates LLP
Chartered Accountants
622-624, The Corporate Centre,
Nirmal Lifestyle, LBS Marg,
Mumbai - 400080

Dear Sir,

MANAGEMENT REPRESENTATION LETTER

This representation letter is provided in connection with your audit of the financial statements of **Finquest Financial Solutions Private Limited.** ("the Company") for the Year ended 31st March, 2020 for the purpose of expressing an opinion as to whether the financial statements give a true and fair view of the financial position of the Company as of 31st March, 2020 and of the results of operations for the year then ended. We acknowledge our responsibility for preparation of financial statements in accordance with the requirements of the Companies Act, 2013 and recognized accounting policies and practices, including the Accounting Standards issued by the Institute of Chartered Accountants of India.

We confirm, to the best of our knowledge and belief, the following representations:

Accounting Policies:

The accounting policies which are material or critical in determining the results of operations for the year or financial position are set out in the Financial Statements. The Financial Statements are prepared on Accrual Basis.

Capital Commitments :

At the Balance Sheet date, there were no outstanding commitments for capital expenditure.

Investments :

Investments are valued as per IND AS applicable.

Valuation of Closing Stock :

Closing stock (shares) is valued at cost or net realizable value whichever is less.

Debtors, Loans and Advances

Balances appearing in the books as at 31st March, 2020 in respect of Debtors are shown in the notes to accounts of the financial statements.

BTP

Liabilities

We have recorded all known liabilities in the financial statements. No guarantees have been given to third parties.

In the opinion of the management, and to the extent of information available from the Company's records there are no amounts payable to the Small Scale Industries as at 31st March, 2020.

Contingent Liabilities

Provisions for Claims and Losses

Provision has been made in the accounts for all known losses and claims of material amounts. As per management decision provision for Non performing assets has been made as per RBI norms instead of ECL method applicable.

Contingent Liabilities have been disclosed in the financial statements.

There have been no events subsequent to the Balance Sheet date which require adjustment of or disclosure in, the financial statements or notes thereto.

Provision for Income Tax Comprises of Current Taxes as also Deferred Taxes. Deferred tax liability is recognised for the Future Tax consequences of Temporary Difference between the tax basis and the carrying values of assets and liabilities. Deferred tax assets are recognised only if there is Virtual Certainty that they will be realised and are reviewed every year. The tax effect is calculated on the accumulated Timing Differences at the end of the year based on the enacted or substantially enacted tax rates.

Profit And Loss Account

Except as disclosed in the financial statements, the results for the year were not materially affected by:

- (a) Transactions of a nature not usually undertaken by the company except a transaction wherein security against loan was sold through a liquidator at a price determined by liquidator to wholly owned subsidiary (Krihaan texchem pvt ltd) because of which profit under other income (Gain in part on realisation of Stressed asset) is booked of Rs. 58,75,81,232/- as disclosed in the financial statements;
- (b) Circumstances of an exceptional or non-recurring nature;
- (c) Charges or credits relating to prior years;
- (d) Changes in accounting policies.

Borrowing cost other than directly attributable to qualifying assets is expensed.

BTP 

Compliance with RBI requirements :

Disclosures and other requirements mandated by RBI for NBFC are all complied with.

General

There have been no irregularities involving management or employees who have a significant role in the system of Internal Control that could have a material effect on the Financial Statements.

The Financial Statements are free of material misstatements, including omissions.

The company has complied with all aspects of contractual agreements that could have a material effect on the financial statements in the event of non-compliance. There has been no non-compliance with requirements of regulatory authorities that could have a material effect on the Financial Statements in the event of non-compliance.

We have no plans or intentions that may materially affect the carrying value or classification of Assets and Liabilities reflected in the Financial Statements.

No personal expenses of employees and Directors have been charged to the revenue account, other than those payable under contractual obligation or in accordance with generally accepted business practices.

Also no remuneration has been paid to the directors or managing director in financial year 2019-20.

We have submitted to your representatives, minutes covering all the meetings of the Board of Directors ('BOD') held during the year. These minutes constitute a full and complete record of all meetings of the BOD held during the period ended March 31, 2020.

The Company has no disputed tax demands, in respect of Income Tax, Wealth Tax, Sales Tax, other than those demands not acknowledged as debt by the Company and are under appeal and adequately disclosed in the financial statements or audit report.

None of the Directors are disqualified under section 164 of the Companies Act, 2013.
